091-H8C-2004	Operate Metal Cutting Equipment.....	3-90
091-H8T-2001	Maintain Recovery Vehicle Weapons.....	3-92
091-H8T-2002	Complete Preventive Maintenance Checks and Services on a Tracked Recovery Vehicle	3-95
091-H8T-2003	Use Basic Issue Items Related to Tracked Recovery Vehicle	3-97
091-H8T-2004	Drive Tracked Recovery Vehicle	3-99
091-H8T-2005	Operate Auxiliary Power Unit	3-102
091-H8T-2006	Operate the Boom and Hoist Winch on a Tracked Recovery Vehicle	3-104
091-H8T-2007	Operate the Spade on a Tracked Recovery Vehicle	3-106
091-H8T-2008	Operate the Winches on a Tracked Recovery Vehicle	3-108
091-H8T-2009	Recover a Mired Tracked Vehicle	3-110
091-H8T-2010	Recover an Overturned Tracked Vehicle	3-112
091-H8T-2011	Tow a Tracked Vehicle on Improved/Highway Surface	3-114
091-H8T-2012	Tow of a Tracked Vehicle Cross Country.....	3-116
091-H8T-2013	Complete Field Expedient Recovery on a Tracked Vehicle	3-119

Subject Area 4: BRADLEY A3 TASKS (ASI B9 ONLY)

091-AB9-0006	Maintain Power Management and Distribution Subsystem (PMDS).....	3-121
091-AB9-0008	Maintain Turret Drive Subsystem (TDS)	3-123
091-AB9-0009	Maintain Position Sensor Subsystem (PSS)	3-125
091-AB9-0010	Maintain Improved Bradley Acquisition Subsystem (IBAS).....	3-127
091-AB9-0011	Maintain Commander's Independent Viewer (CIV) Subsystem	3-129
091-AB9-0012	Maintain Fire Control Subsystem (FCS).....	3-131
091-AB9-0014	Perform Fault Isolation Test (FIT) Using Vehicle Diagnostic Maintenance Software (VDMS)	3-133
091-AB9-0015	Maintain Turret Cooling Fan Components	3-135
091-AB9-0016	Operate the Chassis Modernization Embedded Diagnostic (CMED) Software	3-137
091-AB9-0017	Perform Fault Isolation Using Chassis Modernization Embedded Diagnostic (CMED) Software.....	3-139
091-AB9-0018	Operation of Commander's Tactical Display (CTD)	3-141
091-AB9-0019	Familiarization of Vehicle Diagnostic Maintenance Software (VDMS).....	3-143
091-AB9-0020	Familiarization of Vehicle 1553 Data Bus System	3-145
091-AB9-0021	Update Vehicle Software on the M2/M3 System.....	3-147

Skill Level 3

Subject Area 5: COMMON LOGISTIC TASKS

091-CLT-3001	Manage a Maintenance Facility Safety Program	3-149
091-CLT-3002	Establish a Maintenance Facility Publications/Electronic Technical Manual Library	3-151
091-CLT-3003	Establish Maintenance Facilities	3-154
091-CLT-3004	Prepare a Maintenance Facility Standing Operating Procedure	3-155
091-CLT-3005	Manage Tool Control Procedures	3-156
091-CLT-3006	Manage Key Control Procedures	3-158
091-CLT-3007	Manage the TMDE Calibration Program	3-159
091-CLT-3009	Supervise Maintenance Operations	3-160
091-CLT-3012	Manage Maintenance Information Systems Reports	3-163

Subject Area 6: TECHNICAL TASKS (SKILL LEVEL 3)

091-91M-3004	Perform Diagnostic Procedures of the Traversing System on the M2/M3 BFV	3-164
091-91M-3005	Perform Diagnostic Procedures of the Elevation System on the M2/M3 BFV ...	3-166
091-91M-3006	Perform Diagnostic Procedures of the Stabilization System on the M2/M3 BFV	3-168
091-91M-3012	Perform Diagnostic Procedures of the Hull Electrical Systems on the M2/M3 BFV	3-170
091-91M-3015	Perform Diagnostic Procedures of the VTA-903T Diesel Engine on the M2/M3 BFV	3-172
091-91M-3016	Perform Battlefield Damage Assessment and Repair of the M2/M3 BFV	3-174
091-91M-3026	Perform Diagnostic Procedures of the Transmission Assembly on the M2/M3 BFV	3-176
091-91M-3036	Perform Diagnostic Procedures of the Deck Clearance System on the M2/M3 BFV	3-178
091-91M-3044	Perform Diagnostic Procedures of the Integrated Sight Unit on the M2/M3 BFV	3-180
091-91M-3046	Perform Diagnostic Procedures of the 25MM Gun System on the M2/M3 BFV	3-182
091-91M-3047	Perform Diagnostic Procedures of the 7.62 Gun System on the M2/M3 BFV ...	3-184
091-91M-3048	Perform Diagnostic Procedures of the TOW Launcher System on the M2/M3 BFV	3-186
091-91M-3049	Perform Diagnostic Procedures of the Turret Drive on the M2/M3 BFV	3-188
091-91M-3050	Perform Diagnostic Procedures of the GNRs/CMDRs Hand Station on the M2/M3 BFV	3-190
091-91M-3051	Perform Diagnostic Procedures of the Turret Electrical System on the M2/M3 BFV	3-192
091-91M-3052	Perform Diagnostic Procedures of the Fire Control System on the M2/M3 BFV	3-194
091-91M-3053	Repair Turret Distribution Box on the M2/M3 BFV	3-196
091-91M-3054	Repair TOW Elevation Drive Gearbox on the M2/M3 BFV	3-198
091-91M-3055	Repair Vehicle Distribution Box on the M2/M3 BFV	3-200
091-91M-3056	Repair Traverse Drive Gearbox on the M2/M3 BFV	3-202
091-91M-3057	Remove Turret Assembly on the M2/M3 BFV	3-204
091-91M-3058	Install Turret Assembly on the M2/M3 BFV	3-206

Skill Level 4**Subject Area 7: COMMON LOGISTICS MANAGEMENT TASKS**

APPENDIX A - A-1

APPENDIX B - B-1

GlossaryGLOSSARY-1

Supporting References..... REFERENCES-1

PREFACE

This soldier training publication (STP) is intended for soldiers holding MOS 91M, Skill Levels 1, 2, 3, and 4, their supervisors, trainers, and commanders. It contains an MOS Training Plan providing information needed to plan, conduct, and evaluate unit training, one of the most important jobs of military leaders. It includes standardized training objectives in the form of task summaries that can be used to train and evaluate soldiers on critical tasks supporting unit missions during wartime.

Soldiers holding MOS 91M should have access to this publication. Trainers and firstline supervisors should actively plan for soldiers' access, making it available in work areas, unit learning centers, and unit libraries. However, it is not intended for an individual copy to be provided to each MOS holder. The STP is obtainable on line from the Reimer Digital Library (RDL).

Tasks in this manual apply to both Active and Reserve Component soldiers.

The proponent of this publication is HQ TRADOC. Submit comments and recommendations on DA Form 2028 (Recommended Changes to Publications and Blank Forms) directly to: Department of the Army, Training Directorate, Ordnance Training Division, ATTN: ATCL-TDF, building 5020, 2221 Adams Ave, Fort Lee, VA 23801-2102.

Unless this publication states otherwise, masculine nouns and pronouns do not refer exclusively to men.

CHAPTER 1

Introduction

1-1. General. This soldier training publication (STP) identifies individual MOS training requirements for soldiers holding MOS 91M. Commanders, trainers, and soldiers should use it to plan, conduct, and evaluate individual training in units. The STP is the primary MOS reference for supporting self-development, evaluating MOS proficiency, and training of 91M soldiers. Commanders employ two primary methods to evaluate soldiers' proficiency:

- Commander's evaluation. Commander's evaluations are local tests or assessments of soldiers' performance of MOS-specific and common tasks critical to the unit mission. They may be conducted year-round.
- Common task test (CTT). CTTs are hands-on tests used to evaluate proficiency on common tasks. Alternate written tests are provided if equipment is not available for hands-on testing.

This publication is the soldier's primary reference to prepare for a commander's evaluation of MOS-specific tasks. It contains task summaries for all critical tasks specific to the MOS and skill level (SL). Commanders and trainers will use this soldier's manual/trainer's guide (SM/TG) to plan and conduct training and commander's evaluations.

Chapter 2, Trainer's Guide, contains information needed to plan training requirements for this MOS. The trainer's guide

- Identifies subject areas in which soldiers must be trained.
- Identifies critical tasks for each subject area.
- Specifies where soldiers are initially trained on each task.
- Recommends how often each task should be trained to sustain proficiency.
- Recommends a strategy for cross-training soldiers.
- Recommends a strategy for training soldiers to perform higher-level tasks.

Use this STP along with STP 21-1-SMCT (Soldier's Manual of Common Tasks, Skill Level 1), STP 21-24-SMCT (Soldier's Manual of Common Tasks, Skill Levels 2-4), Army training and evaluation programs (ARTEPs), FM 25-4 (How to Conduct Training Exercises), FM 25-5 (Training for Mobilization and War), FM 25-100 (Training the Force), and FM 25-101 (Battle-Focused Training) to establish effective training plans and programs that integrate soldier, leader, and collective tasks.

1-2. Task Summaries. Task summaries outline wartime performance requirements for each critical task in the STP. They provide both soldier and trainer with the information necessary to prepare, conduct, and evaluate critical task training. As a minimum, task summaries include information soldiers must know and skills they must perform to standard for each task. Following is the task summary format:

- Task number. The task number is a 10-digit number that identifies the task and skill level. Include the task number and title in any correspondence relating to the task.
- Task title. The task title identifies the action to be performed.
- Conditions. The task conditions statement describes the field or garrison conditions under which the task will be performed and identifies the equipment, tools, references, job aids, and supporting personnel that the soldier needs to perform the task in wartime.

- **Standards.** The task standards describe how well and to what level of proficiency the soldier must perform the task under wartime conditions. Standards are typically expressed in terms of accuracy, completeness, duration, sequence, speed, and tolerance.
- **Performance measures.** This section identifies specific actions that the soldier must accomplish to complete the task successfully. Performance measures appear in a GO/NO-GO rating format for easy evaluation. Some tasks may also include detailed training information in a Training Information Outline and an Evaluation Preparation Section. The Evaluation Preparation Section indicates necessary modifications to task performance in order to train and evaluate a task that can not be trained to the wartime standard under wartime conditions. It may also include special training and evaluation preparation instructions to accommodate these modifications and any instructions that should be given to the soldier before evaluation.
- **References.** This section identifies references that provide more detailed explanations of task performance requirements than are given in the task summary.
- **Warnings.** Warnings alert users to the possibility of immediate personal injury or equipment damage.
- **Notes.** Notes provide additional supportive explanations or tips relating to task performance.

1-3. **Soldier's Responsibilities.** Each soldier is responsible for performing individual tasks identified by the first-line supervisor based on the unit's mission-essential task list (METL). Soldiers must perform tasks to the standards included in the task summary. If soldiers have questions about tasks or which tasks in this manual they must perform, they are responsible for asking their first-line supervisor for clarification. First-line supervisors know how to perform each task or can direct soldiers to appropriate training materials, including current field manuals, technical manuals, and Army regulations. Soldiers are responsible for using these materials to maintain performance. They are also responsible for maintaining performance of all common tasks listed in the SMCTs at their current skill level and below.

Periodically, soldiers should ask their supervisor or another soldier to check their performance to ensure that they can perform the tasks.

1-4. **NCO Self-Development and the STP.** Self-development is a key component of leader development. Leaders follow planned, progressive, sequential self-development programs developed by the individual NCO and his or her first-line supervisor to enhance and sustain military competencies. Self-development consists of individual study, research, professional reading, practice, and self-assessment. The self-development concept requires NCOs, as Army professionals, to take responsibility for remaining current in all phases of their MOS. The STP is the NCO's primary source for maintaining MOS proficiency.

Another important resource for self-development is the Army Correspondence Course Program (ACCP). Information is available at local education centers or on line through the Army Institute for Professional Development (AIPD) web site, <http://www.train.army.mil/>. The web site offers on-line enrollment.

1-5. **Commander's Responsibilities.** Commanders must ensure that their unit training plans prepare the unit for war by enabling soldiers to develop and sustain proficiency in their MOS and skill level tasks. Commanders should design unit training programs to provide individual training for all soldiers assigned to the unit and to evaluate soldier proficiency routinely as part of the commander's evaluation program. The unit training program should also integrate individual training with crew drills and other collective training. The MOS training plan provides information on which to base integration, cross-train, train-up, and sustainment training programs. Commanders should use the MOS training plan when developing unit training plans.

1-6. Trainer's Responsibilities. Training is the business of all unit leaders. First-line leaders are the principal trainers in the unit because they directly supervise soldiers and lead crews, squads, sections, and teams.

Trainers can use the MOS training plan to determine the critical tasks each soldier is responsible for. They should tell each soldier which tasks he or she must be able to perform. Trainers should evaluate task performance to determine which tasks each soldier can or cannot perform to standard. Soldiers who cannot perform a task to standard need further training. This STP helps the trainer do what trainers get paid to do; train. Developing effective training is explained in detail in FM 25-100 and FM 25-101.

Every task summary in this STP includes performance measures, which trainers may use year-round to determine if soldiers can perform critical tasks to the specified standards. The performance measures identify what the trainer needs to observe to score a soldier's performance. A blank space is provided for the trainer to check either the GO or NO-GO column for each performance measure. Some tasks require the trainer to watch the soldier perform them (evaluate the process). Other tasks call for the trainer to focus on the results of the soldier's performance (evaluate the product). Comments should not be written on the task summary.

Trainers can monitor the progress of their soldiers by recording task go/no-go results. Trainers may use DA Form 5164-R (Hands-On Evaluation) to record the performance measures a soldier passed or failed. The form, which may be locally reproduced, applies to all tasks in this STP. Trainers may have DA Form 5164-R overprinted with information unique to their training requirements before reproducing it. See Appendix A of this STP for a sample DA Form 5164-R with instructions.

Trainers may use DA Form 5165-R (Field Expedient Squad Book) to record hands-on go/no-go results for a group of soldiers (for example, a crew, section, or squad) having the same MOS and skill level. This form supports conduct of commander's evaluations, and can be used to record training results gathered in the field during slack time for all MOSs and skill levels. Use of this form is optional. See Appendix B for a sample DA Form 5165-R with instructions. Trainers should work with each soldier until tasks can be performed to specific task summary standards.

1-7. Training Support. References have been identified for each task to assist in planning and conducting training. A consolidated list of references identified by type, publication number, and title and a comprehensive glossary of acronyms, abbreviations, and definitions are included in this STP.

2-1. **General.** The MOS Training Plan (MTP) identifies the essential components of a unit training plan for individual training. Units have different training needs and requirements based on differences in environment, location, equipment, dispersion, and similar factors. Therefore, the MTP should be used as a guide for conducting unit training and not a rigid standard. The MTP consists of two parts. Each part is designed to assist the commander in preparing a unit training plan which satisfies integration, cross training, training up, and sustainment training requirements for soldiers in this MOS.

Part One of the MTP shows the relationship of an MOS skill level between duty position and critical tasks. These critical tasks are grouped by task commonality into subject areas.

Section I lists subject area numbers and titles used throughout the MTP. These subject areas are used to define the training requirements for each duty position within an MOS.

Section II identifies the total training requirement for each duty position within an MOS and provides a recommendation for cross training and train-up/merger training.

- **Duty Position Column.** This column lists the duty positions of the MOS, by skill level, which have different training requirements.
- **Subject Area Column.** This column lists, by numerical key (see Section I), the subject areas a soldier must be proficient in to perform in that duty position.

- **Cross-Train Column.** This column lists the recommended duty position for which soldiers should be cross-trained.
- **Train-Up/Merger Column.** This column lists the corresponding duty position for the next higher skill level or MOSC the soldier will merge into on promotion.

Part Two lists, by general subject areas, the critical tasks to be trained in an MOS and the type of training required (resident, integration, or sustainment).

- **Subject Area Column.** This column lists the subject area number and title in the same order as Section I, Part One of the MTP.
- **Task Number Column.** This column lists the task numbers for all tasks included in the subject area.
- **Title Column.** This column lists the task title for each task in the subject area.
- **Training Location Column.** This column identifies the training location where the task is first trained to soldier training publications standards. If the task is first trained to standard in the unit, the word "Unit" will be in this column. If the task is first trained to standard in the training base, it will identify, by brevity code (ALC, SLC, etc.), the resident course where the task was taught. Figure 2-1 contains a list of training locations and their corresponding brevity codes.

SLC	Senior Leader's Course
ASI/SD	Additional Skill Identifier/Special Duty
ALC	Advanced Leader's Course
SNCOC	Senior NCO Course
AIT	Advanced Individual Training
UNIT	Trained in the Unit

Figure 2-1. Training Locations

- **Sustainment Training Frequency Column.** This column indicates the recommended frequency at which the tasks should be trained to ensure soldiers maintain task proficiency. Figure 2-2 identifies the frequency codes used in this column.

BA	- Biannually
AN	- Annually
SA	- Semiannually
QT	- Quarterly
MO	- Monthly
BW	- Biweekly
WK	- Weekly

Figure 2-2. Sustainment Training Frequency Codes

- **Sustainment Training Skill Level Column.** This column lists the skill levels of the MOS for which soldiers must receive sustainment training to ensure they maintain proficiency to soldier's manual standards.

CRITICAL TASKS

Task Number	Title	Training Location	Sust Tng Freq	Sust Tng SL
Skill Level 1				
Subject Area 1. ADMINISTRATIVE TASKS				
091-109-0001	Maintain Test, Measurement, and Diagnostic Equipment (TMDE)	AIT	SA	1/2
091-109-0002	Maintain Assigned Vehicles (PMCS)	AIT	DA	1/2
091-109-0003	Maintain Assigned Tool Kits	AIT	DA	1/2
091-109-0006	Maintain Equipment Inspection and Maintenance Worksheet (DA Form 2404) and (DA Form 5988-E)	AIT	SA	1/2
Subject Area 2. TECHNICAL TASKS (SKILL LEVEL 1/2)				
091-91M-1001	Correct Malfunction of the VTA-903T Diesel Engine on the M2/M3 BFV	AIT	QT	1/2
091-91M-1002	Correct Malfunction of the Vehicle Charging System on the M2/M3 BFV	AIT	QT	1/2
091-91M-1003	Correct Malfunction of the Vehicle Starting System on the M2/M3 BFV	AIT	QT	1/2
091-91M-1004	Correct Malfunction of the Vehicle Transmission Assembly on the M2/M3 BFV	AIT	QT	1/2
091-91M-1005	Correct Malfunction of the Brake System on the M2/M3 BFV	AIT	QT	1/2
091-91M-1006	Correct Malfunction of the Fire Extinguishing and Suppression System on the M2/M3 BFV	AIT	QT	1/2
091-91M-1007	Correct Malfunction of the Ammunition Feeder-Loader System on the M2/M3 BFV	AIT	QT	1/2
091-91M-1008	Correct Malfunction of the Turret Elevation System on the M2/M3 BFV	AIT	QT	1/2
091-91M-1009	Correct Malfunction of the Hydraulic Access Door on the M2/M3 BFV	AIT	AN	1/2
091-91M-1010	Correct Malfunction of the Track Assembly Components on the M2/M3 BFV	AIT	AN	1/2
091-91M-1011	Correct Malfunction of the Suspension System on the M2/M3 BFV	AIT	AN	1/2
091-91M-1012	Correct Malfunction of the Fuel System of the M2/M3 BFV	AIT	AN	1-2
091-91M-1013	Correct Malfunction of the Hull Electrical Systems on the M2/M3 BFV			
091-91M-1015	Correct Malfunction of the Ramp Assembly on the M2/M3 BFV	AIT	AN	1/2
091-91M-1017	Correct Malfunction of the CBRN System on the M2/M3 BFV	AIT	AN	1/2
091-91M-1018	Correct Malfunction of the Cooling System on the M2/M3 BFV	AIT	AN	1/2
091-91M-1019	Correct Malfunction of the Steering System on the M2/M3	AIT	AN	1/2

CRITICAL TASKS

Task Number	Title	Training Location	Sust Tng Freq	Sust Tng SL
	BFV			
091-91M-1020	Correct Malfunction of the Power Unit on the M2/M3 BFV	AIT	AN	1/2
091-91M-1021	Correct Malfunction of the Fan System on the M2/M3 BFV	AIT	AN	1/2
091-91M-1022	Correct Malfunction of the Personnel Heater on the M2/M3 BFV	AIT	AN	1/2
091-91M-1023	Correct Malfunction of the Final Drive Assembly on the M2/M3 BFV	AIT	AN	1/2
091-91M-1024	Correct Malfunction of the Deck Clearance System on the M2/M3 BFV	AIT	AN	1/2
091-91M-1027	Perform Scheduled Services on the M2/M3 BFV	AIT	AN	1/2
091-91M-1030	Correct Malfunction of the Integrated Sight Unit (ISU) on the M2/M3 BFV	AIT	AN	1/2
091-91M-1032	Maintain the 25MM Gun System on the M2/M3 BFV	AIT	AN	1/2
091-91M-1033	Maintain the 7.62 Gun System on the M2/M3 BFV	AIT	AN	1/2
091-91M-1034	Correct Malfunction of the TOW Launcher System on the M2/M3 BFV	AIT	AN	1/2
091-91M-1035	Correct Malfunction of the Traversing System on the M2/M3 BFV	AIT	AN	1/2
091-91M-1036	Correct Malfunction of the Turret Drive on the M2/M3 BFV	AIT	AN	1/2
091-91M-1038	Correct Malfunction of the Turret Electrical Systems on the M2/M3 BFV	AIT	AN	1/2
091-91M-1039	Correct Malfunction of Compression Ignition Air Induction System on the M2/M3 BFV	AIT	AN	1/2
091-91M-1040	Perform Battlefield Damage Assessment and Repair on the M2/M3 BFV	AIT	AN	1/2
Subject Area 3. RECOVERY (ASI H8 ONLY)				
091-H8T-2014	Maintain Charging System on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2015	Maintain Starting System on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2016	Maintain Auxiliary Power Unit (APU) on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2017	Maintain Brake System on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2018	Maintain Nose Cone Assembly on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2019	Maintain Micro Switches on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2020	Perform Winch Ground Hop Procedures on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8C-2001	Locate a Recovery Site	ASI/SD	SA	1/2
091-H8C-2002	Determine Recovery Methods	ASI/SD	SA	1/2
091-H8C-2003	Operate Tactical Communications Equipment	ASI/SD	SA	1/2
091-H8C-2004	Operate Metal Cutting Equipment	ASI/SD	SA	1/2
091-H8T-2001	Maintain Recovery Vehicle Weapons	ASI/SD	SA	1/2
091-H8T-2002	Complete Preventive Maintenance Checks and Services on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2003	Use Basic Issue Items Related to Tracked Recovery Vehicle	ASI/SD	AN	1/2

CRITICAL TASKS

Task Number	Title	Training Location	Sust Tng Freq	Sust Tng SL
091-H8T-2004	Drive Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2005	Operate Auxiliary Power Unit	ASI/SD	SA	1/2
091-H8T-2006	Operate the Boom and Hoist Winch on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2007	Operate the Spade on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2008	Operate the Winches on a Tracked Recovery Vehicle	ASI/SD	SA	1/2
091-H8T-2009	Recover a Mired Tracked Vehicle	ASI/SD	SA	1/2
091-H8T-2010	Recover an Overturned Tracked Vehicle	ASI/SD	SA	1/2
091-H8T-2011	Tow a Tracked Vehicle on Improved/Highway Surface	ASI/SD	SA	1/2
091-H8T-2012	Tow of a Tracked Vehicle Cross Country	ASI/SD	SA	1/2
091-H8T-2013	Complete Field Expedient Recovery on a Tracked Vehicle	ASI/SD	SA	1/2
Subject Area 4. BRADLEY A3 TASKS (ASI B9 ONLY)				
091-AB9-0006	Maintain Power Management and Distribution Subsystem (PMDS)	ASI/SD	QT	1/2
091-AB9-0008	Maintain Turret Drive Subsystem (TDS)	ASI/SD	QT	1/2
091-AB9-0009	Maintain Position Sensor Subsystem (PSS)	ASI/SD	QT	1/2
091-AB9-0010	Maintain Improved Bradley Acquisition Subsystem (IBAS)	ASI/SD	QT	1/2
091-AB9-0011	Maintain Commander's Independent Viewer (CIV) Subsystem	ASI/SD	QT	1/2
091-AB9-0012	Maintain Fire Control Subsystem (FCS)	ASI/SD	QT	1/2
091-AB9-0014	Perform Fault Isolation Test (FIT) Using Vehicle Diagnostic Maintenance Software (VDMS)	ASI/SD	QT	1/2
091-AB9-0015	Maintain Turret Cooling Fan Components	ASI/SD	QT	1/2
091-AB9-0016	Operate the Chassis Modernization Embedded Diagnostic (CMED) Software	ASI/SD	QT	1/2
091-AB9-0017	Perform Fault Isolation Using Chassis Modernization Embedded Diagnostic (CMED) Software	ASI/SD	QT	1/2
091-AB9-0018	Operation of Commander's Tactical Display (CTD)	ASI/SD	QT	1/2
091-AB9-0019	Familiarization of Vehicle Diagnostic Maintenance Software (VDMS)	ASI/SD	QT	1/2
091-AB9-0020	Familiarization of Vehicle 1553 Data Bus System	ASI/SD	QT	1/2
091-AB9-0021	Update Vehicle Software on the M2/M3 System	ASI/SD	QT	1/2
Skill Level 3				
Subject Area 5. COMMON LOGISTIC TASKS				
091-CLT-3001	Manage a Maintenance Facility Safety Program	ALC	AN	3
091-CLT-3002	Establish a Maintenance Facility Publications/Electronic Technical Manual Library	ALC	AN	3
091-CLT-3003	Establish Maintenance Facilities	ALC	AN	3
091-CLT-3004	Prepare a Maintenance Facility Standing Operating Procedure	ALC	AN	3
091-CLT-3005	Manage Tool Control Procedures	ALC	AN	3
091-CLT-3006	Manage Key Control Procedures	ALC	AN	3
091-CLT-3007	Manage the TMDE Calibration Program	ALC	AN	3

CRITICAL TASKS

Task Number	Title	Training Location	Sust Tng Freq	Sust Tng SL
091-CLT-3009	Supervise Maintenance Operations	ALC	AN	3
091-CLT-3012	Manage Maintenance Information Systems Reports	ALC	AN	3
Subject Area 6. TECHNICAL TASKS (SKILL LEVEL 3)				
091-91M-3004	Perform Diagnostic Procedures of the Traversing System on the M2/M3 BFV	ALC	SA	3
091-91M-3005	Perform Diagnostic Procedures of the Elevation System on the M2/M3 BFV	ALC	SA	3
091-91M-3006	Perform Diagnostic Procedures of the Stabilization System on the M2/M3 BFV	ALC	SA	3
091-91M-3012	Perform Diagnostic Procedures of the Hull Electrical Systems on the M2/M3 BFV	ALC	SA	3
091-91M-3015	Perform Diagnostic Procedures of the VTA-903T Diesel Engine on the M2/M3 BFV	ALC	SA	3
091-91M-3016	Perform Battlefield Damage Assessment and Repair of the M2/M3 BFV	ALC	SA	3
091-91M-3026	Perform Diagnostic Procedures of the Transmission Assembly on the M2/M3 BFV	ALC	SA	3
091-91M-3036	Perform Diagnostic Procedures of the Deck Clearance System on the M2/M3 BFV	ALC	SA	3
091-91M-3044	Perform Diagnostic Procedures of the Integrated Sight Unit on the M2/M3 BFV	ALC	SA	3
091-91M-3046	Perform Diagnostic Procedures of the 25MM Gun System on the M2/M3 BFV	ALC	SA	3
091-91M-3047	Perform Diagnostic Procedures of the 7.62 Gun System on the M2/M3 BFV	ALC	SA	3
091-91M-3048	Perform Diagnostic Procedures of the TOW Launcher System on the M2/M3 BFV	ALC	SA	3
091-91M-3049	Perform Diagnostic Procedures of the Turret Drive on the M2/M3 BFV	ALC	SA	3
091-91M-3050	Perform Diagnostic Procedures of the GNRs/CMDRs Hand Station on the M2/M3 BFV	ALC	SA	3
091-91M-3051	Perform Diagnostic Procedures of the Turret Electrical System on the M2/M3 BFV	ALC	SA	3
091-91M-3052	Perform Diagnostic Procedures of the Fire Control System on the M2/M3 BFV	ALC	SA	3
091-91M-3053	Repair Turret Distribution Box on the M2/M3 BFV	ALC	SA	3
091-91M-3054	Repair TOW Elevation Drive Gearbox on the M2/M3 BFV	ALC	SA	3
091-91M-3055	Repair Vehicle Distribution Box on the M2/M3 BFV	ALC	SA	3
091-91M-3056	Repair Traverse Drive Gearbox on the M2/M3 BFV	ALC	SA	3
091-91M-3057	Remove Turret Assembly on the M2/M3 BFV	ALC	SA	3
091-91M-3058	Install Turret Assembly on the M2/M3 BFV	ALC	SA	3
Skill Level 4				
Subject Area 7. COMMON LOGISTICS MANAGEMENT TASKS				
091-CLT-4001	Perform Senior Rater Responsibilities for a Maintenance Section	SLC	AN	4

CRITICAL TASKS

Task Number	Title	Training Location	Sust Tng Freq	Sust Tng SL
091-CLT-4002	Supervise Platoon/Section Administrative Procedures	SLC	AN	4
091-CLT-4003	Manage Combat Stress	SLC	AN	4
091-CLT-4006	Coordinate Support for the Maintenance Platoon/Section	SLC	AN	4
091-CLT-4010	Integrate Automated Logistics Support Systems	SLC	AN	4
091-CLT-4011	Plan Logistics Support for Maintenance Operations	SLC	AN	4
091-CLT-4021	Prepare Standing Operating Procedures for Maintenance Operations	SLC	AN	4
091-CLT-4022	Supervise the Deployment of Company Maintenance Team/Recovery Support Team/Maintenance Support Team	SLC	AN	4
091-CLT-4023	Conduct a Route Reconnaissance for a Maintenance Mission	SLC	AN	4
091-CLT-4024	Conduct an Area Reconnaissance for a Maintenance Mission	SLC	AN	4
091-CLT-4025	Manage Battlefield Maintenance Support	SLC	AN	4
091-CLT-4026	Perform Support Operations NCO Duties	SLC	AN	4
091-CLT-4027	Manage Maintenance Operations at a Maintenance Collection Point	SLC	AN	4
091-CLT-4028	Provide Maintenance Support During Tactical Operations	SLC	AN	4

CHAPTER 3

MOS/Skill Level Tasks

Skill Level 1

Subject Area 1: ADMINISTRATIVE TASKS

Maintain Test, Measurement, and Diagnostic Equipment (TMDE)

091-109-0001

Conditions: In a contemporary operational environment (COE) given applicable test, measurement, and diagnostic equipment (TMDE); Army regulation (AR) 750-43; Technical Bulletin (TB) 43-180; Technical Manual (TM) 9-6625-2301-14&P; TM 11-6625-3052-14; suitable tools; and suitable cleaning materials.

Standards: Maintain the TMDE in accordance with the applicable technical publications, procedures, and specifications. When this task was completed, the equipment was fully mission-capable, calibration date was current, and maintenance actions had been identified.

Performance Steps

1. Select and use applicable references.
2. Inspect TMDE for damage.
3. Test-operate TMDE to determine proper operation.
4. Check calibration date, if required.
5. Clean and/or lubricate TMDE, if required.
6. Store or package TMDE properly after maintenance or use.
7. Maintain the contact test set (CTS).
8. Complete The Army Maintenance Management System (TAMMS) forms, as required.
9. Perform required preventive maintenance checks and services (PMCS).
10. Maintain tools and equipment.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Selected and used applicable references.	—	—
2. Inspected TMDE for damage.	—	—
3. Tested-operated TMDE to determine proper operation.	—	—
4. Checked calibration date, if required.	—	—

Performance Measures	<u>GO</u>	<u>NO-GO</u>
5. Cleaned and/or lubricated TMDE, if required.	_____	_____
6. Stored or packaged TMDE properly after maintenance or use.	_____	_____
7. Maintained the CTS.	_____	_____
8. Completed The Army Maintenance Management System (TAMMS) forms, as required.	_____	_____
9. Performed required PMCS.	_____	_____
10. Maintained tools and equipment.	_____	_____

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

Maintain Assigned Vehicles (PMCS)
091-109-0002

Conditions: In a contemporary operational environment (COE) given an assigned vehicle; repair parts; petroleum, oil, lubricants (POL) products, if needed; additional tools and equipment as indicated in the technical manuals (TMs); Department of the Army (DA) Pamphlet 750-8; DA Form 5988-E (Equipment Inspection Maintenance Worksheet); other applicable technical publications; other necessary forms; and supervision/assistance.

Standards: Maintain assigned vehicle preventive maintenance checks and services (PMCS) in accordance with the applicable technical publications, procedures, and specifications. When this task was completed, the vehicle was fully mission-capable or deficiencies/shortcomings were annotated and required maintenance actions to be performed by other than assigned vehicle operator had been identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and test, measurement, and diagnostic equipment (TMDE).
3. Practice shop safety and maintenance discipline.
4. Perform PMCS in accordance with TM.
5. Annotate actions taken on DA Form 5988-E (Equipment Inspection Maintenance Worksheet).
6. Maintain tools and equipment.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures	<u>GO</u>	<u>NO-GO</u>
1. Selected and used applicable technical publications.	_____	_____
2. Selected and used applicable tools and TMDE.	_____	_____
3. Practiced shop safety and maintenance discipline.	_____	_____
4. Performed PMCS in accordance with TM.	_____	_____
5. Annotated actions taken on DA Form 5988-E (Equipment Inspection Maintenance Worksheet).	_____	_____
6. Maintained tools and equipment.	_____	_____

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

Maintain Assigned Tool Kits**091-109-0003**

Conditions: In a contemporary operational environment (COE) given applicable tool kits, applicable references, Technical Manual (TM) 9-243, Department of the Army (DA) Form 5988-E (Equipment Inspection Maintenance Worksheet), cleaning materials, and solvents or lubricants.

Standards: Inspected and serviced the assigned tool kits in accordance with the applicable technical publications, procedures, and specifications. When this task was completed, assigned tools were in operable condition, tool kits or sets were complete, or section chief or supervisor were notified of shortages.

Performance Steps

1. Select and use applicable references.
2. Inspect tools for serviceability and accountability.
3. Practice shop safety and maintenance discipline.
4. Identify damaged items and notified supervisor.
5. Apply lubricants or preservatives, as needed.
6. Annotate corrective actions taken on DA Form 5988-E.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures

Maintain Equipment Inspection and Maintenance Worksheet (DA Form 2404) and (DA Form 5988-E)
091-109-0006

Conditions: In a contemporary operational environment (COE) given required equipment, Department of the Army (DA) Form 2404 (Equipment Inspection and Maintenance Worksheet), DA Form 5988-E (Equipment Inspection and Maintenance Worksheet), and applicable references.

Standards: DA Form 2404 and DA Form 5988-E are inspected and maintained in accordance with DA Pamphlet 750-8 to ensure all required information had been correctly annotated.

Performance Steps

1. Perform administrative actions.
 - a. Select and use applicable references.
 - b. Practice shop safety and maintenance discipline.
2. Annotate deficiencies as required by technical manual and ensure all entries are complete, as required.
3. Ensure all safety precautions and procedures are followed.
4. Ensure all entries are reviewed and verified by supervisor.
5. Ensure proper disposition of forms.

Evaluation Preparation: Provide the Soldier with the equipment and or materials described in the condition statement.

WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures	<u>GO</u>	<u>NO-GO</u>
1. Performed administrative actions. <ol style="list-style-type: none"> a. Selected and used applicable references. b. Practiced shop safety and maintenance discipline. 	_____	_____
2. Annotated deficiencies as required by technical manual and ensured all entries are complete, as required.	_____	_____
3. Ensured all safety precautions and procedures are followed.	_____	_____
4. Ensured all entries were reviewed and verified by supervisor.	_____	_____
5. Ensured proper disposition of forms.	_____	_____

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

Subject Area 2: TECHNICAL TASKS (SKILL LEVEL 1/2)

**Correct Malfunction of the VTA-903T Diesel Engine on the M2/M3 BFV
091-91M-1001**

Conditions: In a contemporary operational environment (COE) given an applicable vehicle; repair parts; general mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Correct malfunction of the VTA-903T diesel engine on the M2/M3 BFV in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use correct tools and TMDE.
3. Follow prescribed safety procedures.
4. Verify work request.
5. Inspect VTA-903T diesel engine/systems/components.
 - a. Check for any visible damage.
 - b. Check for leaks.
6. Troubleshoot the VTA-903T diesel engine and determine maintenance action to be performed.
7. Verify the fault (s).
8. Adjust and/or replace VTA-903T diesel engine/systems/components.
9. Perform a final operational test to verify that the VTA-903T diesel engine malfunction(s) is correct to specification.
10. Complete TAMMS forms, as required.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Selected and used applicable technical publications.	—	—
2. Selected and used applicable tools and TMDE.	—	—
3. Followed prescribed safety procedures.	—	—
4. Verified work request.	—	—
5. Inspected VTA-903T diesel engine/systems/components.	—	—
6. Troubleshoot the VTA-903T diesel engine and determined maintenance action to be performed.	—	—
7. Verified the fault (s).	—	—
8. Adjusted and/or replaced VTA-903T diesel engine/systems/components.	—	—

Performance Measures	<u>GO</u>	<u>NO-GO</u>
9. Performed a final operational test to verify that the VTA-903T diesel engine malfunction(s) is corrected to specification.	_____	_____
10. Completed TAMMS forms, as required.	_____	_____

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If any performance measure is failed, tell the Soldier what was done wrong and how to do it correctly.

Correct Malfunction of the Vehicle Charging System on the M2/M3 BFV
091-91M-1002

Conditions: In a contemporary operational environment (COE) given an applicable vehicle; repair parts; general mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Correct malfunction of vehicle charging systems in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect the vehicle charging system/components.
5. Troubleshoot vehicle charging system and determine maintenance action to be performed.
6. Adjust and/or replace vehicle charging system/components.
7. Perform a final operational test to verify that the vehicle charging system malfunction(s) is corrected to specification.
8. Annotate corrective actions taken on the DA Form 5988-E.
9. Maintain tools and equipment.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Selected and used applicable technical publications.	—	—
2. Selected and used applicable tools and TMDE.	—	—
3. Practiced shop safety and maintenance discipline.	—	—
4. Inspected the vehicle charging systems/components.	—	—
5. Troubleshoot vehicle charging system and determined maintenance action to be performed.	—	—
6. Adjusted and/or replaced vehicle charging systems/components.	—	—

Correct Malfunction of the Vehicle Starting System on the M2/M3 BFV
091-91M-1003

Conditions: In a contemporary operational environment (COE) given an applicable vehicle; repair parts; general mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Correct malfunction of the vehicle starting system on the M2/M3 BFV in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect compression ignition systems/components.
5. Troubleshoot compression ignition system and determine maintenance action to be performed.
6. Replace/repair faulty part(s)/component(s).
7. Perform a final operational test to verify that the ignition system malfunction(s) is corrected to specification.
8. Annotate corrective actions taken on the DA Form 5988-E.
9. Maintain tools and equipment.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Selected and used applicable technical publications.	—	—
2. Selected and used applicable tools and TMDE.	—	—
3. Practiced shop safety and maintenance discipline.	—	—
4. Inspected compression ignition systems/components.	—	—
5. Troubleshoot ignition system and determined maintenance action to be performed.	—	—
6. Replaced/repared the faulty part(s)/component(s).	—	—
7. Performed a final operational test to verify that the ignition system malfunction(s) is corrected to specification.	—	—
8. Annotated corrective actions taken on the DA Form 5988-E.	—	—
9. Maintained tools and equipment.	—	—

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If any performance measure is failed, tell the Soldier what was done wrong and how to do it correctly.

Correct Malfunction of the Vehicle Transmission Assembly on the M2/M3 BFV
091-91M-1004

Conditions: In a contemporary operational environment (COE) given an M2/M3 series vehicle; repair parts; general mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Correct malfunction of the vehicle transmission assembly on the M2/M3 BFV in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect the transmission assembly systems/components.
5. Troubleshoot the transmission assembly and determine maintenance action to be performed.
 - a. Adjust the controller cut-in.
 - b. Adjust neutral steer.
6. Perform a final operational test to verify that the transmission assembly malfunction(s) is corrected to specification.
7. Annotate corrective actions taken on the DA Form 5988-E.
8. Maintain tools and equipment.

Correct Malfunction of the Hull Electrical Systems on the M2/M3 BFV
091-91M-1013

Conditions: In a contemporary operational environment (COE) given an M2/M3 series vehicle; repair parts; artillery and turret mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Correct malfunction of the hull electrical systems on the M2/M3 BFV in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified..

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect hull systems component(s).
5. Troubleshoot hull electrical systems fault(s) using TMDE and determine maintenance action(s) required.
6. Adjust and/or replace hull electrical systems component(s).
7. Perform a final operational test to verify that the hull electrical systems malfunction(s) is corrected to specification.
8. Annotate corrective actions taken on the DA Form 5988-E.
9. Maintain tools and equipment.

Evaluation Preparation: None

Performance Measures	<u>GO</u>	<u>NO-GO</u>
1. Selected and used applicable technical publications.	_____	_____
2. Selected and used applicable tools and TMDE.	_____	_____
3. Practiced shop safety and maintenance discipline.	_____	_____
4. Inspected hull systems component(s).	_____	_____
5. Troubleshoot hull electrical systems fault(s) using TMDE and determined maintenance action(s) required.	_____	_____
6. Adjusted and/or replaced hull electrical systems component(s).	_____	_____
7. Performed a final operational test to verify that the hull electrical systems malfunction(s) is corrected to specification.	_____	_____
8. Annotated corrective actions taken on the DA Form 5988-E.	_____	_____
9. Maintained tools and equipment.	_____	_____

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If any performance measure is failed, tell the Soldier what was done wrong and how to do it correctly.

Correct Malfunction of the Ramp Assembly on the M2/M3 BFV
091-91M-1015

Conditions: In a contemporary operational environment (COE) given an M2/M3 series vehicle; repair parts; artillery and turret mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Correct malfunction of the ramp assembly on the M2/M3 BFV in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect the ramp assembly component(s).
5. Troubleshoot the ramp assembly and determine maintenance action to be performed.
6. Perform a final operational test to verify that the ramp assembly malfunction(s) is corrected to specification.
7. Annotate corrective actions taken on the DA Form 5988-E.
8. Maintain tools and equipment.

Evaluation Preparation: None

Correct Malfunction of the CBRN System on the M2/M3 BFV
091-91M-1017

Conditions: In a contemporary operational environment (COE) given an M2/M3 series vehicle; repair parts; artillery and turret mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Correct malfunction of chemical, biological, radiological, and nuclear (CBRN) system on the M2/M3 BFV in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect the CBRN system/components.
5. Troubleshoot the CBRN system and determine maintenance action to be performed.
6. Replace the CBRN system faulty component(s).
7. Perform a final operational test to verify that the CBRN system malfunction(s) is corrected to specification.
8. Annotate corrective actions taken on the DA Form 5988-E.
9. Maintain tools and equipment.

Evaluation Preparation: None

Correct Malfunction of the Cooling System on the M2/M3 BFV
091-91M-1018

Conditions: In a contemporary operational environment (COE) given an M2/M3 series vehicle; repair parts; artillery and turret mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Correct malfunction of the cooling system on the M2/M3 BFV in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect the liquid cooled engine system component(s).
5. Troubleshoot liquid cooled engine and determine the maintenance action to be performed.
 - a. Replace the cooling fan.
 - b. Replace the radiator.
 - c. Replace and/or adjust the coolant pump.
6. Perform a final operational test to verify that the liquid cooled engine malfunction(s) is corrected to specification.
7. Annotate corrective actions taken on the DA Form 5988-E.
8. Maintain tools and equipment.

Maintain the 25MM Gun System on the M2/M3 BFV
091-91M-1032

Conditions: In a contemporary operational environment (COE) given an M2/M3 series vehicle; repair parts; artillery and turret mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Maintain the 25mm gun system on the M2/M3 BFV in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect cannon assembly systems/components.
5. Remove the M242, 25mm automatic gun.
6. Troubleshoot the M242, 25mm automatic gun.
7. Repair the bolt and carrier assembly.
8. Install the M242, 25mm automatic gun.
9. Perform a final operational test to verify that the cannon assembly malfunction(s) is corrected to specification.
10. Annotate corrective actions taken on the DA Form 5988-E.
11. Maintain tools and equipment.

Evaluation Preparation: None

Correct Malfunction of the TOW Launcher System on the M2/M3 BFV
091-91M-1034

Conditions: In a contemporary operational environment (COE) given an M2/M3 series vehicle; repair parts; artillery and turret mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Correct malfunction of the tube-launched, optically tracked, wire-guided (TOW) Launcher System on the M2/M3 BFV in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect turret launcher system/components.
5. Troubleshoot M2/M3 TOW rotor and gun rotor deck clearance switches.
 - a. Adjust TOW rotor switch assembly.
 - b. Adjust gun rotor deck clearance switch.
6. Troubleshoot M2/M3 TOW elevation drive and lift mechanism assemblies.
 - a. Adjust TOW elevation drive variable resistor assembly.
 - b. Adjust TOW lift mechanism lower limit position switch.
 - c. Adjust TOW lift mechanism upper limit position switch.
 - d. Adjust TOW elevation drive shift linkage
7. Perform a final operational test to verify that the turret launcher system malfunction(s) is corrected to specification.
8. Annotate corrective actions taken on the DA Form 5988-E.
9. Maintain tools and equipment.

Perform Battlefield Damage Assessment and Repair on the M2/M3 BFV
091-91M-1040

Conditions: In a contemporary operational environment (COE) given an M2/M3 series vehicle; repair parts; artillery and turret mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Perform Battle Damage Assessment and Repair on the M2/M3 BFV in accordance with the applicable technical publications. When this task is completed, the equipment or end item must be fully mission-capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Review work request/commander's directive.
2. Ensure applicable technical publications are available.
3. Inspect vehicle to diagnose damage.
4. Determine necessary BDAR repairs.
5. Ensure proper tools, TMDE, and equipment are available to perform BDAR.
6. Ensure all safety precautions and procedures are followed.
7. Ensure task is performed in accordance with appropriate technical manuals and references.
8. Conduct an in-process inspection.
9. Perform a final inspection to ensure the vehicle is capable of functioning in a battlefield environment.
10. Ensure maintenance forms are completed, as required.
11. Ensure tools and equipment are properly maintained.

Evaluation Preparation: None

Performance Measures	<u>GO</u>	<u>NO-GO</u>

Subject Area 3: RECOVERY (ASI H8 ONLY)

**Maintain Charging System on a Tracked Recovery Vehicle
091-H8T-2014**

Conditions: Starting in a classroom and later transitioning to the maintenance shop, with assistance, given an M88 Series Tracked Recovery Vehicle, general mechanic's tool kit, special tools, test, measurement, and diagnostic equipment (TMDE), safety equipment, required references, student handouts, and an awareness of the contemporary operational environment (COE) variable and factors.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: As a group, complete the practical exercise, "Maintain Charging System on a Tracked Recovery Vehicle", in accordance with the applicable technical publications, practical exercise checklist, and student supplements within the time allotted. When this practical exercise is complete, all performance measures must be met and the system must be fully operational. An instructor will verify your group's work upon completion of this practical exercise.

Performance Steps

1. Select and use applicable publications.
 - a. Identify which technical manual to be used.
 - b. Follow steps outlined in technical manual for charging system.
2. Inventory and determine serviceability of BII and TMDE.
 - a. Ensure all tools are serviceable.
 - b. Identify appropriate tools in BII.
3. Check all electrical connections.
 - a. Follow procedures outlined in technical manual.
 - b. Replace any worn parts.
4. Perform diagnostic procedures on charging system.
 - a. Conduct a risk assessment.
 - b. Follow steps outlined in technical manual.
5. Follow prescribed safety procedures.
 - a. Follow safety precautions outlined in technical manual.
 - b. Follow safety guidelines outlined in unit SOP.
6. Complete TAMMS forms as required.
 - a. Annotate any deficiencies on appropriate forms.
 - b. Ensure forms are in accordance with DA Pamphlet 738-751 and DA Pamphlet 750-8.
7. Maintain tools and equipment.
 - a. Ensure all BII is accounted for.
 - b. Ensure all tools are cleaned and stored properly.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures	<u>GO</u>	<u>NO-GO</u>
1. Selected and used applicable publications.	—	—
a. Identified which technical manual was used.		
b. Followed steps outlined in technical manual for charging system.		
2. Inventoried and determined serviceability of BII and TMDE.	—	—
a. Ensured all tools were serviceable.		
b. Identified appropriate tools in BII.		
3. Checked all electrical connections.	—	—
a. Followed procedures outlined in technical manual.		
b. Replaced any worn parts.		
4. Performed diagnostic procedures on charging system.	—	—
a. Conducted a risk assessment.		
b. Followed steps outlined in technical manual.		
5. Followed prescribed safety procedures.	—	—
a. Followed safety precautions outlined in technical manual.		
b. Followed safety guidelines outlined in unit SOP.		
6. Completed TAMMS forms as required.	—	—
a. Annotated any deficiencies on appropriate forms.		
b. Ensured forms were in accordance with DA Pamphlet 738-751 and DA Pamphlet 750-8.		
7. Maintained tools and equipment.	—	—
a. Ensured BII was accounted for.		
b. Ensured all tools were cleaned and stored properly.		

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

When this practical exercise is complete, all performance measures must be met and the system must be fully operational. An instructor will verify your group's work upon completion of this practical exercise.

Performance Steps

1. Select and use applicable publications.
 - a. Identify appropriate technical manual (TM).
 - b. Follow steps outlined in TM.
2. Inventory and determine appropriate basic issue items (BII) and TMDE.
 - a. Ensure all tools are serviceable.
 - b. Identify appropriate tools in BII.
3. Check all electrical connections.
 - a. Follow procedures outlined in TM.
 - b. Replace any worn parts.
4. Perform diagnostic procedures for starting system.
 - a. Follow procedures outlined in TM.
 - b. Adjust alternator, if needed.
 - c. Adjust belt tension, if needed.
5. Follow prescribed safety procedures.
 - a. Follow safety procedures outlined in TM.
 - b. Follow safety guidelines outlined in unit standing operating procedure (SOP).
6. Complete all applicable forms.
 - a. Annotate any deficiencies on appropriate forms.
 - b. Ensure forms are in accordance with DA Pamphlet 738-751 and DA Pamphlet 750-8.
7. Maintain tool and equipment.
 - a. Ensure all BII is accounted for.
 - b. Ensure all tools are cleaned and serviceable.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Selected and used applicable publications.	—	—
a. Identified appropriate technical manual (TM).		
b. Followed steps outlined in TM.		
2. Inventoried and determined appropriate basic issue items (BII) and TMDE.	—	—
a. Ensured all tools were serviceable.		
b. Identified appropriate tools in BII.		
3. Checked all electrical connections.	—	—

Performance Measures	<u>GO</u>	<u>NO-GO</u>
a. Followed procedures outlined in TM.		
b. Replaced any worn parts.		
4. Performed diagnostic procedures for starting system	_____	_____
a. Followed procedures outlined in TM.		
b. Adjusted alternator, if required.		
c. Adjusted belt tension, if needed.		
5. Followed prescribed safety procedures.	_____	_____
a. Followed safety procedures outlined in TM.		
b. Followed safety guidelines outlined in unit standing operating procedure (SOP).		
6. Completed all applicable forms.	_____	_____
a. Annotated any deficiencies on appropriate forms.		
b. Ensured forms are in accordance with DA Pamphlet 738-751 and DA Pamphlet 750-8.		
7. Maintained tools and equipment.	_____	_____
a. Ensured all BII was accounted for.		
b. Ensured all tools were cleaned and serviceable.		

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

Maintain Auxiliary Power Unit (APU) on a Tracked Recovery Vehicle
091-H8T-2016

Conditions: Starting in a classroom and later transitioning to the maintenance shop, with assistance, given an M88 Series Tracked Recovery Vehicle, general mechanic's tool kit, special tools, test, measurement, and diagnostic equipment (TMDE), safety equipment, required references, student handouts, and an awareness of the contemporary operational environment (COE) variable and factors.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: As a group, complete the practical exercise, "Maintain Auxiliary Power Unit (APU) on a Tracked Recovery Vehicle", in accordance with the applicable technical publications, practical exercise checklist, and student supplements within the time allotted. When this practical exercise is complete, all performance measures must be met and the system must be fully operational. An instructor will verify your group's work upon completion of this practical exercise.

Performance Steps

1. Select and use applicable publications.
 - a. Identify which technical manual will be used.
 - b. Follow steps outlined in technical manual.
2. Inventory BII and TMDE.
 - a. Ensure all tools are serviceable.
 - b. Identify which tools will be used.
3. Practice maintenance discipline.
 - a. Follow safety guidelines for motor-pool.
 - b. Ensure proper safety equipment is utilized.
4. Inspect vehicle APU components.
 - a. Ensure there is no visible damage to components.
 - b. Follow procedures outlined in technical manual.
5. Follow prescribed safety procedures.
 - a. Follow safety precautions outlined in technical manual.
 - b. Follow safety guidelines outlined in unit SOP.
6. Clean vehicle APU mounting components.
 - a. Clean debris that will cause damage to vehicle and system.
 - b. Inspect for damage to gaskets or seals.
7. Replace APU components, as required.
 - a. Use appropriate tools.
 - b. Disconnect electrical connections.
 - c. Tag and label parts for turn-in, if required.
8. Perform final operational check to verify system is operational.
 - a. Follow steps outlined in technical manual.
 - b. Annotate any deficiencies on applicable forms, if needed.
9. Maintain tools and equipment.
 - a. Ensure all BII is accounted for.
 - b. Ensure all tools are cleaned and stored properly.

Performance Measures

1. Selected and used applicable publications.

Maintain Brake System on a Tracked Recovery Vehicle
091-H8T-2017

Conditions: Starting in a classroom and later transitioning to the maintenance shop, with assistance, given an M88 Series Tracked Recovery Vehicle, general mechanic's tool kit, special tools, test, measurement, and diagnostic equipment (TMDE), safety equipment, required references, student handouts, and an awareness of the contemporary operational environment (COE) variable and factors.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: As a group, complete the practical exercise, "Maintain Brake System on a Tracked Recovery Vehicle", in accordance with the applicable technical publications, practical exercise checklist, and student supplements within the time allotted. When this practical exercise is complete, all performance measures must be met and the system must be fully operational. An instructor will verify your group's work upon completion of this practical exercise.

Performance Steps

1. Select and use applicable publications.
 - a. Identify which technical manual will be used.
 - b. Follow steps outlined in technical manual.
2. Select and use correct tools and TMDE.
 - a. Identify applicable tools in BII.
 - b. Ensure tools are serviceable.
3. Follow prescribed safety procedures.
 - a. Follow procedures outlined in technical manual.
 - b. Follow safety precautions outlined in unit SOP.
4. Practice maintenance discipline.
 - a. Follow safety guidelines outlined in motor-pool.
 - b. Ensure proper safety equipment is used, if needed.
5. Inspect vehicle brake system components.
 - a. Follow steps outlined in technical manual.
 - b. Check vehicle for leaks.
 - c. Check for missing components.
6. Replace vehicle brake system components, if required.
 - a. Remove damage components, if required.
 - b. Tag and label part for turn-in.
7. Perform final operational inspection.
 - a. Ensure parts are tightened to specification.
 - b. Verify fault was correct, if required.
 - c. Take vehicle on a road test and perform PMCS.
8. Maintain tools and equipment.
 - a. Ensure all tools are accounted for.
 - b. Ensure all tools and equipment are cleaned properly.
9. Complete DA Form 5988-E, if required.
 - a. Annotate faults corrected on applicable forms.
 - b. Ensure paperwork gets turned-in to ULLS clerk.

Maintain Nose Cone Assembly on a Tracked Recovery Vehicle
091-H8T-2018

Conditions: Starting in a classroom and later transitioning to the maintenance shop, with assistance, given an M88 Series Tracked Recovery Vehicle, general mechanic's tool kit, special tools, test, measurement, and diagnostic equipment (TMDE), safety equipment, required references, student handouts, and an awareness of the contemporary operational environment (COE) variable and factors.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: As a group, complete the practical exercise, "Maintain Nose Cone Assembly on a Tracked Recovery Vehicle", in accordance with the applicable technical publications, practical exercise checklist, and student supplements within the time allotted. When this practical exercise is complete, all performance measures must be met and the system must be fully operational. An instructor will verify your group's work upon completion of this practical exercise.

Performance Steps

1. Select and use applicable publications.
 - a. Identify which technical manual will be used.
 - b. Follow steps outlined in technical manual.
2. Select and use correct tools and TMDE.
 - a. Identify applicable tools in BII.
 - b. Ensure serviceability of tools.
3. Follow prescribed safety procedures
 - a. Follow procedures outlined in technical manual.
 - b. Follow safety precautions outlined in unit SOP.
4. Practice maintenance discipline.
 - a. Follow safety guidelines outlined in motor-pool.
 - b. Ensure proper safety equipment is used.
5. Inspect vehicle Nose crane assembly and winch,
 - a. Follow steps outlined in technical manual.
 - b. Check assembly for serviceability.
 - c. Check for missing components.
6. Replace nose crane assembly components, if required.
 - a. Follow steps outlined in technical manual.
 - b. Use proper tools for specified job.
 - c. Remove any damaged components.
 - d. Tag and label broken components for turn-in, if needed.
7. Perform operational inspection.
 - a. Ensure parts are tightened to specification.
 - b. Verify fault was corrected, if required.
8. Maintain tools and equipment.
 - a. Ensure all tools are accounted for.
 - b. Ensure tools and equipment are cleaned properly.
9. Complete DA Form 5988-E, if required.
 - a. Annotate fault corrected on applicable forms.
 - b. Ensure paperwork gets turned-in to ULLS clerk.

Maintain Micro Switches on a Tracked Recovery Vehicle

091-H8T-2019

Conditions: Starting in a classroom and later transitioning to the maintenance shop, with assistance, given an M88A2 Tracked Recovery Vehicle, general mechanic's tool kit, special tools, test, measurement, and diagnostic equipment (TMDE), safety equipment, required references, student handouts, and an awareness of the contemporary operational environment (COE) variable and factors.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: As a group, complete the practical exercise, "Maintain Micro Switches on a M88A2 Tracked Recovery Vehicle", in accordance with the applicable technical publications, practical exercise checklist, and student supplements within the time allotted. When this practical exercise is complete, all performance measures must be met and the system must be fully operational. An instructor will verify your group's work upon completion of this practical exercise.

Performance Steps

1. Select and use applicable publication.
 - a. identify which technical manual will be used.
 - b. Follow steps outlined in technical manual.
2. Follow prescribed safety procedures.
 - a. Follow procedures outlined in technical manual.
 - b. Follow safety procedures outlined in unit SOP.
3. Practice maintenance discipline.
 - a. Follow safety guidelines outlined in motor-pool.
 - b. Ensure proper safety equipment is used.
4. Inspect vehicle micro switches.
 - a. Follow steps outlined in technical manual.
 - b. Disconnect batteries, if needed.
 - c. Check for missing parts.
5. Replace micro switches, if required.
 - a. Follow steps outlined in technical manual.
 - b. Use proper tools for specified job.
 - c. Remove any damaged parts.
 - d. Tag and label any broken or worn parts for turn-in.
6. Perform operational inspection.
 - a. Ensure batteries are connected.
 - b. Ensure switches are properly functioning.
7. Maintain tools and equipment.
 - a. Ensure all tools are accounted for.
 - b. Clean and store tools properly.
8. Complete DA Form 5988-E, as required.
 - a. Annotate fault corrected on applicable forms.
 - b. Ensure paperwork gets turned-in to ULLS clerk.

Performance Measures

1. Selected and used applicable publications.
 - a. Identified which technical manual was used.

Perform Winch Ground Hop Procedures on a Tracked Recovery Vehicle

091-H8T-2020

Conditions: Starting in a classroom and later transitioning to the maintenance shop, with assistance, given an M88A2 Tracked Recovery Vehicle, general mechanic's tool kit, special tools, test, measurement, and diagnostic equipment (TMDE), safety equipment, required references, student handouts, and an awareness of the contemporary operational environment (COE) variable and factors.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: As a group, complete the practical exercise, "Perform Winch Ground Hop Procedures on a Tracked Recovery Vehicle", in accordance with the applicable technical publications, practical exercise checklist, and student supplements within the time allotted. When this practical exercise is complete, all performance measures must be met and the system must be fully operational. An instructor will verify your group's work upon completion of this practical exercise.

Performance Steps

1. Select and use applicable publication.
 - a. Identify which technical manual (TM) will be used.
 - b. Follow steps outlined in TM.
2. Follow prescribed safety procedures.
 - a. Follow procedures outlined in TM.
 - b. Followed safety procedures outlined in unit standing operating procedure (SOP).
3. Practice maintenance discipline.
 - a. Follow safety guidelines outlined in motor pool.
 - b. Ensure proper protective gear is used.
4. Perform ground hop procedures.
 - a. Ensure all leads are connected.
 - b. Follow steps outlined in TM.
 - c. Use appropriate tools for specified job.
 - d. Tag and label any broken or worn parts for turn-in.
5. Perform operational inspection.
 - a. Conduct inspection of vehicle and parts for serviceability.
 - b. Conduct a preventive maintenance checks and services (PMCS).
6. Complete DA Form 5988-E (Equipment Inspection Maintenance Worksheet), as required.
 - a. Annotate any deficiencies on applicable forms.
 - b. Ensure forms are in accordance with DA Pamphlet 738-751 and DA Pamphlet 750-8.
 - c. Ensure paperwork gets turned-in to Unit Level Logistics System (ULLS) clerk.
7. Maintain tools and equipment.
 - a. Ensure all tools are accounted for.
 - b. Clean and store tools properly.
 - c. Ensure tools and equipment are cleaned and serviceable.

Locate a Recovery Site
091-H8C-2001

Conditions: In a contemporary operational environment (COE) given a representative recovery vehicle, required materials, multi-capability tool kit, and applicable references.

Standards: Locate a recovery site to within 10 meters and identified primary and alternate recovery routes determining distance for both with no greater than a 10 percent error.

Performance Steps

1. Select and use applicable publications.
2. Identify terrain features.
3. Identify map symbols and colors.
4. Locate site using military grid reference system.
5. Calculate distance.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Determine Recovery Methods

091-H8C-2002

Conditions: In a contemporary operational environment (COE) given a representative recovery vehicle, required materials, general mechanic's tool kit, and applicable references including Field Manual (FM) 5-125, Training Circular (TC) 43-35, and recovery vehicle Technical Manual (TM) 9-2320-279-10-1, TM 9-2320-279-10-2, TM 9-2320-279-20-1, TM 9-2320-279-20-2, and TM 9-2320-279-20-3.

Standards: Determine recovery methods, source of effort, and mechanical advantage needed in accordance with references.

Performance Steps

1. Select and use applicable publications.
2. Reconnoiter area.
3. Estimate situation.
4. Calculate ratios.
5. Obtain resistance.
6. Verify solution.
7. Erect rigging.
8. Recheck rigging.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Operate Tactical Communications Equipment

091-H8C-2003

Conditions: In a contemporary operational environment (COE) given a representative wheel vehicle (M984 series), required materials, general mechanic's tool kit, Technical Manual (TM) 11-5820-890-10-3, TM 9-2320-279-10-1, TM 9-2320-279-10-2, TM 9-2320-279-20-1, TM 9-2320-279-20-2, and TM 9-2320-279-20-3, and other applicable publications.

Standards: Stated the procedures for installing, operating, and using correct radio procedures for clear, concise, and secure communications in accordance with the appropriate publications.

Performance Steps

1. Select and use applicable publications.
2. Prepare communications equipment for operation.
3. Send tactical communications.
4. Receive tactical communications
5. Shut down tactical communications operation.
6. Follow prescribed safety procedures.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures	<u>GO</u>	<u>NO-GO</u>
1. Selected and used applicable publications.	_____	_____
2. Prepared communications equipment for operation.	_____	_____
3. Sent tactical communications.	_____	_____
4. Received tactical communications.	_____	_____
5. Shut down tactical communications operation.	_____	_____
6. Followed prescribed safety procedures.	_____	_____

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

Operate Metal Cutting Equipment

091-H8C-2004

Conditions: In a contemporary operational environment (COE) given a representative recovery vehicle, required materials, general mechanic's tool kit, Training Circular (TC) 9-237, and applicable recovery vehicle Technical Manual (TM) 9-2320-279-10-1, TM 9-2320-279-10-2, TM 9-2320-279-20-1, TM 9-2320-279-20-2, and TM 9-2320-279-20-3.

Standards: Stated the procedures for installing, operating, and using correct radio procedures for clear, concise, and secure communications in accordance with the appropriate publications.

Performance Steps

1. Select and use applicable publications.
2. Determine the method to cut metal.
3. Prepare metal cutting equipment, as required.
4. Cut metal.
5. Secure metal cutting equipment.
6. Follow prescribed safety procedures.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Maintain Recovery Vehicle Weapons
091-H8T-2001

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, Department of the Army (DA) Form 2404 (Equipment Inspection and Maintenance Worksheet), DA Form 5988-E (Equipment Inspection Maintenance Worksheet), technical manual (TM) 9-2350-256-10, TM 9-2350-256-20-1, TM 9-2350-256-20-2, TM 9-2350-256-24P-1, TM 9-2350-256-24P-2, and other applicable publications.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Maintain the M88 series vehicle weapons in accordance with the preventive maintenance checks and services (PMCS) table and procedures and specifications of the applicable TM. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publication.
 - a. Ensure appropriate TM is used.
 - b. Ensure steps are followed outlined in the TM.
2. Use proper safety methods.
 - a. Ensure proper safety methods are followed.
 - b. Follow prescribed safety precautions outlined in TM.
3. Disassemble machine gun.
 - a. Ensure machine gun is on safe.
 - b. Lock bolt to the rear
 - c. Ensure weapon is clear.
 - d. Follow steps outline in the TM.
4. Check for broken or missing parts.
 - a. Separate machine gun components.
 - b. Visually inspect each machine gun component for damage.
 - c. Tag and label any parts for turn-in.
 - d. Ensure DA Form 2404 (Equipment Inspection and Maintenance Worksheet) or DA Form 5988-E (Equipment Inspection Maintenance Worksheet) has been filled out.
5. Ensure all parts are cleaned and lubricated.
 - a. Clean each machine gun component.
 - b. Follow lubrication procedures outline in the TM.
6. Assemble machine gun.
 - a. Locate and identify machine gun components to be assembled.
 - b. Follow assemble procedures outline within the TM.
7. Set head-space and timing.
 - a. Ensure proper tools are used.
 - b. Follow procedures outlined in the TM for setting head-space and timing.
 - c. Verify head-space and timing settings.
8. Inspect machine gun mount for missing, cracks, or broken parts.
 - a. Follow proper procedures outlined in the TM.
 - b. Tag and label any broken parts for turn-in.
 - c. Ensure part has been requisitioned on proper paperwork.
9. Ensure launcher tubes are free of rust, dirt and corrosion.

Performance Steps

- a. Follow proper procedures outlined in the TM.
 - b. Remove any rust, dirt and corrosion found within or on launcher tubes.
10. Ensure that grenade launcher wiring harness connectors are connected.
 - a. Locate and identify grenade launcher wiring harness connectors.
 - b. Check grenade launcher wiring harness for proper connections.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Complete Preventive Maintenance Checks and Services on a Tracked Recovery Vehicle 091-H8T-2002

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, Department of the Army (DA) Form 2404 (Equipment Inspection and Maintenance Worksheet), DA Form 5988-E (Equipment Inspection Maintenance Worksheet), DA Pamphlet 750-8, Technical Manual (TM) 9-2350-256-10, TM 9-2350-256-20-1, TM 9-2350-256-20-2, TM 9-2350-256-24P-1, TM 9-2350-256-24P-2, and TM 9-2350-292-10, and other applicable forms and publications.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Inspect the M88 series vehicle in accordance with the preventive maintenance checks and services (PMCS) table of the applicable TM and record deficiencies on DA Form 2404 or DA Form 5988-E in accordance with DA Pamphlet 750-8. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Ensure appropriate TM is used.
 - b. Follow steps outlined in appropriate publication.
2. Select and use proper tools and test, measurement, and diagnostic equipment (TMDE).
 - a. Identify appropriate tools in basic issue items (BII).
 - b. Ensure appropriate tools are serviceable.
3. Describe operation of vehicle systems and subsystems.
 - a. Locate appropriate systems and subsystems operations in the TM.
 - b. Read and follow systems and subsystems maintenance operating guidance outlined in TM.
4. Determine readiness of system components.
 - a. Ensure components are at operating temperature.
 - b. Verify equipment operating gauges and instruments.
5. Identify deficiencies and shortcomings.
 - a. Follow steps outlined in TM pertaining to deficiencies.
 - b. Record deficiencies and shortcomings on DA Form 2404 or DA Form 5988-E.
6. Correct shortcomings identified as operator maintenance.
 - a. Take appropriate measures to repair all deficiencies and shortcomings that need to be repaired.
 - b. Notify supervisor if fault is found beyond operator level of maintenance.
7. Follow prescribed safety procedures.
 - a. Follow safety procedures outlined in TM.
 - b. Follow safety procedures outlined in unit standing operating procedure (SOP).

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures	<u>GO</u>	<u>NO-GO</u>

Use Basic Issue Items Related to Tracked Recovery Vehicle
091-H8T-2003

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, Technical Manual (TM) 9-2350-256-10, TM 9-2350-256-20-1, TM 9-2350-256-20-2, TM 9-2350-256-24P-1, TM 9-2350-256-24P-2, TM 9-2350-292-10, and other applicable forms and publications.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Remove, clean, and store the recovery related components of end item (COEI) and basic issue items (BII) in accordance with the procedures in TM 9-2350-256-10 and TM 9-2350-292-10. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Ensure appropriate TM is used.
 - b. Follow steps outlined in appropriate publication.
2. Inventory and determine serviceability of BII.
 - a. Identify appropriate tools in BII.
 - b. Inspect BII for serviceability.
3. Repair BII, as required.
 - a. Follow steps outlined in TM pertaining to serviceability of BII.
 - b. Tag and label unserviceable BII for turn-in.
4. Replace BII, as required.
 - a. Follow directions outlined in publication on replacement of BII.
 - b. Ensure appropriate BII has been ordered on applicable forms.
5. Use BII, as required.
 - a. Select appropriate BII pertaining to job.
 - b. Follow procedures in TM.
6. Service BII, as required.
 - a. Refer to TM for servicing data.
 - b. Verify servicing information in TM.
7. Store BII properly.
 - a. Ensure all tools are accounted for.
 - b. Ensure tools are cleaned before storing.
8. Follow prescribed safety procedures.
 - a. Follow safety procedures outlined in TM.
 - b. Follow safety procedures outlined in unit standing operating procedure (SOP).

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Drive Tracked Recovery Vehicle

091-H8T-2004

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, The Army Maintenance Management System (TAMMS) forms, Technical Manual (TM) 9-2350-256-10, TM 9-2350-256-20-1, TM 9-2350-256-20-2, TM 9-2350-256-24P-1, TM 9-2350-256-24P-2, and other applicable publications.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Negotiate obstacles in forward and reverse gears without stalling, jerking, getting stuck, or causing damage to the vehicle and while obeying all safety procedures, traffic regulations, and hand signals. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Ensure appropriate TM is used.
 - b. Verify procedures while performing tracked recovery operations.
2. Perform preventive maintenance checks and services (PMCS).
 - a. Identify what TM to use.
 - b. Follow procedures outlined in TM.
 - c. Annotate any deficiencies on appropriate forms.
 - d. Ensure forms are in accordance with DA Pamphlet 738-751 and DA Pamphlet 750-8.
3. Start engine.
 - a. Ensure vehicle parking brake is engaged.
 - b. Check instrument panel to ensure gauges are operational.
 - c. Follow start up procedures outlined in TM.
4. Place vehicle in motion.
 - a. Disengage parking brake.
 - b. Follow safety procedures outlined in motor pool.
 - c. Ensure ground guides are used, if required.
5. Drive vehicle, maintaining proper engine speed when descending and ascending grades.
 - a. Follow vehicle operating instructions, while maintaining proper engine speed, when descending and ascending grades.
 - b. Verify vehicle operating instructions, while maintaining proper engine speed, when descending and ascending grades.
6. Drive vehicle in reverse.
 - a. Ensure ground guide is used.
 - b. Maintain proper speed while vehicle is in reverse.
7. Stop vehicle.
 - a. Follow safety guidelines outlined in motor pool.
 - b. Carefully bring the vehicle to a stop, while adhering to safe driving habits.
8. Parking vehicle.
 - a. Ensure proper ground guides are used.
 - b. Ensure there is enough clearance from other vehicles.
9. Stop engine (normal and emergency procedures).
 - a. Follow guidelines outlined in TM for proper stopping procedures.
 - b. Ensure parking brake is engaged.

Performance Steps

- c. Ensure vehicle is chock blocked.
 - d. Perform an after-operations PMCS.
10. Complete TAMMS forms, as required.
 - a. Annotate any deficiencies on appropriate forms.
 - b. Ensure parts are ordered, if needed.
 - c. Turn forms into Unit Level Logistics System (ULLS) clerk.
 11. Follow prescribed safety procedures.
 - a. Follow safety procedures outlined in TM.
 - b. Follow safety procedures outlined in unit standing operating procedure (SOP).

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. Operate Auxiliary Power Unit

091-H8T-2005

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, Technical Manual (TM) 9-2350-256-10, TM 9-2350-292-10, TM 9-2350-256-20-1, TM 9-2350-256-20-2, and other applicable publications.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Operate the Auxiliary Power Unit (APU) and basic issue items (BII) powered by the APU in accordance with the procedures in TM 9-2350-256-10 and TM 9-2350-292-10 without damage to the equipment. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Ensure appropriate TM is used.
 - b. Follow steps outlined in TM pertaining to APU procedures.
2. Start APU.
 - a. Follow APU start up procedures outlined in TM.
 - b. Operate APU in accordance with applicable specifications.
 - c. Ensure BII is operable without damage to APU.
3. Actuate generator switch to charge batteries.
 - a. Follow procedures outlined in TM.
 - b. Verify procedures while actuated generator switch to charge batteries.
4. Engage hydraulic control levers to start refuel/defuel pump.
 - a. Follow procedures outlined within TM.
 - b. Verify procedures while performing refueling/refueling operations.
5. Connect and operate hydraulic equipment.
 - a. Ensure all steps are followed in accordance with TM.
 - b. Verify connection while operating hydraulic equipment.
6. Shut down APU.
 - a. Ensure shutdown procedures are in accordance with TM.
 - b. Perform preventive maintenance checks and services (PMCS) while applying shutdown procedures.
7. Follow prescribed safety procedures.
 - a. Follow safety procedures outlined in TM.
 - b. Follow safety procedures outlined in unit standing operating procedure (SOP).

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures

1. Selected and used applicable publications.
 - a. Ensured appropriate TM was used.

GO **NO-GO**

Operate the Boom and Hoist Winch on a Tracked Recovery Vehicle

091-H8T-2006

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, and applicable publications including Technical Manual (TM) 9-2350-256-10, TM 9-2350-256-20-1, TM 9-2350-256-20-2, TM 9-2350-256-34, and TM 9-2350-292-10.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Rig and operate the boom on the M88A1/M88A2 tracked recovery vehicle in accordance with the procedures in TM 9-2350-256-10 or TM 9-2350-292-10. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Ensure appropriate TM is used.
 - b. Verify procedures while performing Boom, Hoist, and Winch operations.
2. Prepare vehicle for use of hydraulic equipment.
 - a. Ensure appropriate basic issue items (BII) is used.
 - b. Follow procedures outlined in TM.
 - c. Disconnect any lines and fittings connecting equipment.
 - d. Ensure appropriate equipment is hooked up.
3. Operate boom.
 - a. Follow steps outlined in TM.
 - b. Check equipment for any leaks.
4. Operate hoist winch.
 - a. Ensure all connections are hooked up properly.
 - b. Verify procedures while performing hoist and winch operations.
 - c. Check equipment for any leaks.
5. Secure hydraulic equipment, as required.
 - a. Ensure all equipment is properly secured.
 - b. Ensure area is cleaned in accordance with Environmental Protection Agency (EPA) regulations.
6. Follow prescribed safety procedures.
 - a. Follow safety procedures outlined in motor pool.
 - b. Ensure to follow all safety guidance outlined with standing operating procedure (SOP).

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures

1. Selected and used applicable publications.
 - a. Ensured appropriate TM was used.
 - b. Verified procedures while performing Boom, Hoist, and Winch operations.

GO **NO-GO**

Performance Measures	<u>GO</u>	<u>NO-GO</u>
2. Prepared vehicle for use of hydraulic equipment.	_____	_____
a. Ensured appropriate BII was used.

Operate the Spade on a Tracked Recovery Vehicle

091-H8T-2007

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, Department of the Army (DA) Form 2404 (Equipment Inspection and Maintenance Worksheet), DA Form 5988-E (Equipment Inspection Maintenance Worksheet), Technical Manual (TM) 9-2350-256-10, TM 9-2350-256-20-1, TM 9-2350-256-20-2, TM 9-2350-256-24P-1, TM 9-2350-256-24P-2, TM 9-2350-292-10, and related references.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Operate the spade in accordance with applicable technical publication procedures and specifications without injury to personnel or damage to equipment. When this task is completed, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Ensure appropriate TM is used.
 - b. Follow steps identified in TM for job performance.
2. Prepare vehicle for use of hydraulic equipment.
 - a. Follow steps outlined in TM.
 - b. Perform a before-operations preventive maintenance checks and services (PMCS).
3. Operate spade.
 - a. Follow safety precautions outlined in TM.
 - b. Check equipment for leaks.
 - c. Perform an after-operations PMCS.
 - d. Annotate any deficiencies on appropriate DA Form 2404 and DA Form 5988-E, if needed.
4. Secure hydraulic equipment, as required.
 - a. Ensure all attachments and basic issue items (BII) are secured properly.
 - b. Ensure area is cleaned of any Environmental Protection Agency (EPA) violations.
5. Follow prescribed safety procedures.
 - a. Follow safety procedures outlined in TM.
 - b. Follow safety procedures outlined in unit standing operating procedure (SOP).

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures

1. Selected and used applicable publications.
 - a. Ensured appropriate TM is used.
 - b. Followed steps outlined in TM for job performance.
2. Prepared vehicle for use of hydraulic equipment.
 - a. Followed steps outlined in TM.

Recover a Mired Tracked Vehicle

091-H8T-2009

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, and applicable publications including Technical Manual (TM) 9-2350-256-10, TM 9-2350-256-20-1, TM 9-2350-256-20-2, TM 9-2350-256-24P-1, TM 9-2350-256-24P-2, and TM 9-2350-256-34.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Accomplish task in accordance with applicable TM's procedures and specifications. All safety precautions were observed. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Identify which TM will be used.
 - b. Followed steps outlined in TM.
2. Determine method of rigging.
 - a. Follow steps outlined in TM.
 - b. Ensure rigging lines are not defected.
3. Attach cable to the mired vehicle.
 - a. Follow safety precautions outlined in TM.
 - b. Ensure all observing personnel are at least one cable length away, opposite angle of pull.
4. Prepare recovery vehicle for recovery operations.
 - a. Ensure parking brake is not engaged.
 - b. Inspect tackle and equipment before recovery operation starts.
5. Establish communications between vehicles.
 - a. Observe ground guide while operating recovery equipment.
 - b. Ensure proper speed limit is followed.
6. Recover mired vehicle ensuring that all safety practices were followed.
 - a. Ensure proper safety equipment is used.
 - b. Ensure proper hand signals are used during recovery.
7. Secure recovery equipment.
 - a. Disconnect and stow rigging equipment.
 - b. Perform after-operations preventive maintenance checks and services (PMCS).
 - c. Annotate any deficiencies on appropriate forms, if needed.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures

1. Selected and used applicable publications.
 - a. Identified which TM was used.
 - b. Followed steps outlined in TM.

Recover an Overturned Tracked Vehicle

091-H8T-2010

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, Technical Manual (TM) 9-2350-256-10, TM 9-2350-256-20-1, and related references.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Recover the vehicle from the overturned position in accordance with applicable technical publications. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Ensure appropriate TM is used.
 - b. Follow steps outlined in TM.
2. Position recovery vehicle.
 - a. Follow vehicle operating instructions outlined in TM.
 - b. Carefully position recovery vehicle while adhering to safe driving habits.
3. Attach cable to the overturned vehicle.
 - a. Ensure proper safety equipment is used.
 - b. Inspect cable for broken strands or kinks.
 - c. Remove any loops from cable while it is slack.
 - d. Ensure shackles and pins are properly secured.
4. Prepare recover vehicle for recovery operations.
 - a. Ensure recovery vehicle is upright.
 - b. Set up recovery controls.
5. Establish communication with ground guide.
 - a. Use proper hand signals.
 - b. Keep contact with ground guide at all times.
6. Recover overturned vehicle, ensuring that all safety practices are followed.
 - a. Ensure all observing personnel are out of area of projection.
 - b. Follow overturned vehicle operating instructions outlined in TM.
7. Secure recovery equipment.
 - a. Follow procedures outlined in TM.
 - b. Disconnect and stow rigging equipment.
 - c. Perform after-operations preventive maintenance checks and services (PMCS).
 - d. Annotate any deficiencies on appropriate forms, if needed.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Tow a Tracked Vehicle on Improved/Highway Surface
091-H8T-2011

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, Field Manual (FM) 5-125, Technical Manual (TM) 9-2350-256-10, TM 9-2350-256-20-1, TM 9-2350-256-24P-1, TM 9-2350-256-24P-2, and related references.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Lift and tow a disabled vehicle in accordance with applicable technical publications, procedures, and specifications. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Ensured appropriate TM is used.
 - b. Followed steps outlined in TM.
2. Determine method for towing.
 - a. Follow steps outlined in TM.
 - b. Ensure appropriate basic issue items (BII) and test, measurement, and diagnostic equipment (TMDE) are used.
3. Prepare vehicle for towing.
 - a. Ensure parking brake is disengaged.
 - b. Estimate the situation to determine resistance.
 - c. Compute the total resistance.
4. Hook up vehicle for towing.
 - a. Ensure appropriate hook up devices are used.
 - b. Verify procedures while securing hook attachment to disabled vehicle.
5. Follow prescribed safety procedures.
 - a. Follow safety procedures outlined in TM.
 - b. Ensure safety equipment is used.
6. Establish communication between vehicles.
 - a. Observe ground guide while operating vehicle and equipment.
 - b. Ensure proper speed limit is followed.
7. Tow vehicle to predetermined site.
 - a. Maintain proper speed limit.
 - b. Ensure emergency equipment and tow lights are operable.
8. Disconnect vehicle.
 - a. Ensure parking brake is engaged.
 - b. Disconnect emergency equipment and tow lights.
 - c. Store equipment.
 - d. Conduct after-operations preventive maintenance checks and services (PMCS).
 - e. Annotate any deficiencies on appropriate paperwork, if needed.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any

electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Tow of a Tracked Vehicle Cross Country

091-H8T-2012

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, Field Manual (FM) 5-125, Technical Manual (TM) 9-2350-256-10, and related references.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Tow a disabled vehicle to a predetermined location without causing damage to the equipment or injury to personnel in accordance with applicable publications. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Ensure appropriate TM is used.
 - b. Verify procedures while performing cross country towing of a tracked vehicle.
2. Follow prescribed safety procedures.
 - a. Follow prescribed safety procedures outlined in TM.
 - b. Follow safety guidelines for specified terrain.
3. Position recovery vehicle.
 - a. Ensure ground guide is used.
 - b. Carefully position recovery vehicle while adhering to safe driving habits.
4. Prepare recovery vehicle for towing.
 - a. Ensure parking brake is not engaged.
 - b. Follow vehicle towing operating instructions outlined in TM.
 - c. Use applicable shackles and recovery equipment.
 - d. Estimate the situation and load resistance.
5. Prepare recovery vehicle for towing operation.
 - a. Ensure appropriate hook up devices are used.
 - b. Follow vehicle towing operating instructions outlined in TM.
6. Attach towing bar to disabled vehicle.
 - a. Inspect towing equipment for missing parts.
 - b. Ensure appropriate tow equipment is used.
7. Operate boom.
 - a. Ensure all personnel are out of area of projection.
 - b. Follow vehicle boom operating instructions outlined in TM.
8. Tow disabled vehicle.
 - a. Ensure no objects are under or around vehicle.
 - b. Maintain appropriate speed while towing vehicle.
9. Disconnect towed vehicle.
 - a. Ensure all safety precautions are used when disconnecting tow equipment.
 - b. Ensure parking brake is engaged on vehicle.
 - c. Conduct after-operations preventive maintenance checks and services (PMCS).
 - d. Annotate any deficiencies on appropriate paperwork, if needed.
10. Secure recovery equipment.
 - a. Store all recovery equipment in appropriate basic issue items (BII) storage.

Performance Steps

- b. Ensure all equipment is cleaned before storing.
- c. Ensure all recovery equipment is accounted for.

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

1. Selected and used applicable publications.	—	—
a. Ensured appropriate TM was used.		
b. Verified procedures while performing cross country towing of a tracked vehicle.		
2. Followed prescribed safety procedures.	—	—
a. Followed prescribed safety procedures outlined in TM.		
b. Followed safety guidelines for specific terrain.		
3. Positioned recovery vehicle.	—	—
a. Ensure ground guide was used.		
b. Carefully positioned recovery vehicle while adhering to safe driving habits.		
4. Prepared vehicle for towing.	—	—
a. Ensured parking brake was not engaged.		
b. Followed vehicle towing operating instructions outlined in TM.		
c. Used applicable shackles and recovery equipment.		
d. Estimated the situation and load resistance.		
5. Prepared recovery vehicle for towing operation.	—	—
a. Ensured appropriate hook up devices were used.		
b. Followed vehicle towing operating instructions outlined in TM.		
6. Attached towing bar to disabled vehicle.	—	—
a. Inspected towing equipment for missing parts.		
b. Ensured appropriate tow equipment was used.		
7. Operated boom.	—	—
a. Ensured all personnel were out of area of projection.		
b. Followed vehicle boom operating instructions outlined in TM.		
8. Towed disabled vehicle.	—	—
a. Ensured no objects were under or around vehicle.		
b. Maintained appropriate speed while towing vehicle.		
9. Disconnected towed vehicle.	—	—
a. Ensured all safety precautions were used when disconnecting tow equipment.		
b. Ensured parking brake was engaged on vehicle.		
c. Conducted after-operations PMCS.		
d. Annotated any deficiencies on appropriate paperwork, if needed.		
10. Secured recovery equipment.	—	—
a. Stored all equipment in appropriate BII storage.		
b. Ensured all equipment was cleaned before storing.		
c. Ensured all recovery equipment was accounted for.		

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

Complete Field Expedient Recovery on a Tracked Vehicle
091-H8T-2013

Conditions: In a contemporary operational environment (COE) given a representative tracked vehicle (M88 series), required materials, general mechanic's tool kit, Technical Manual (TM) 9-2350-256-10, TM 9-2350-256-20-1, and related references.

Note: If representative equipment is not available, use applicable equipment and associated references.

Standards: Recover the vehicle using self/field expedient procedures in accordance with applicable technical publications. When this task is complete, the vehicle is fully mission capable or maintenance actions required to be performed by other than H8 skill levels (SLs) 1/2 personnel has been identified.

Performance Steps

1. Select and use applicable publications.
 - a. Identify which TM is used.
 - b. Follow steps outlined in TM.
2. Determine method of field expedient recovery.
 - a. Diagnose vehicle malfunction to determine action to be performed.
 - b. Verify proper tools are available to perform action.
3. Prepare vehicle for field expedient recovery, as required.
 - a. Ensure all safety precautions are used.
 - b. Verify procedures while preparing vehicle for field expedient recovery.
4. Perform vehicle field expedient recovery.
 - a. Obtain proper resistance.
 - b. Check all rigging equipment.
 - c. Coordinate with maintenance support team (MST) to provide technical assistance.
 - d. Ensure all maintenance forms are filled out.
5. Secure recovery equipment.
 - a. Disconnect recovery equipment.
 - b. Verify procedures while securing recovery equipment.
 - c. Ensure all recovery equipment is accounted for.
6. Follow prescribed safety procedures.
 - a. Follow all safety procedures outlined in TM.
 - b. Follow all safety procedures outlined in unit standing operating procedure (SOP).

Evaluation Preparation: WARNING: The following safety precautions must be adhered to when performing the tasks listed in this manual: Do not remove a radiator cap or surge tank cap unless the engine is cool. While working on electrical systems, remove all rings, watches, and jewelry. Before working on the exhaust system, make sure it is cool. Disconnect the negative battery cable prior to performing any electrical system maintenance or when performing repairs in the locality of electrical components. When working around engines that are operating, wear hearing protection. When removing components over 75 pounds, two personnel are required.

Performance Measures	GO	NO-GO
1. Selected and used applicable publications. <ol style="list-style-type: none">a. Identified which TM was used.b. Followed steps outlined in TM.	____	____
2. Determined method of field expedient recovery. <ol style="list-style-type: none">a. Diagnosed vehicle malfunction to determine action to be performed.	____	____

Performance Measures	<u>GO</u>	<u>NO-GO</u>
b. Verified proper tools were available to perform action.		
3. Prepared vehicle for field expedient recovery, as required.	—	—
a. Ensured all safety precautions were used.		
b. Verified procedures while preparing vehicle for field expedient recovery.		
4. Performed vehicle field expedient recovery.	—	—
a. Obtained proper resistance.		
b. Checked all rigging equipment.		
c. Coordinated with MST to provide technical assistance.		
d. Ensured all maintenance forms were filled out.		
5. Secured recovery equipment.	—	—
a. Disconnect recovery equipment.		
b. Verified procedures while securing recovery equipment.		
c. Ensured all recovery equipment was accounted for.		
6. Followed prescribed safety procedures.	—	—
a. Followed all safety precautions outlined in TM.		
b. Followed all safety procedures outlined in unit SOP.		

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

Subject Area 4: BRADLEY A3 TASKS (ASI B9 ONLY)

Maintain Power Management and Distribution Subsystem (PMDS)**091-AB9-0006**

Conditions: In a contemporary operational environment (COE) given a M2/M3A3 series vehicle or a M2/M3A3 series turret trainer, TM 9-2350-294-20-2-1, TM 9-2350-294-20-2-2, TM 9-2350-294-20-2-3, and applicable references.

Standards: Maintain Power Management and Distribution Subsystem (PMDS) in accordance with applicable technical publications. When the task is completed, the equipment or end item is fully mission capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select/use applicable publications.
2. Select/use proper tools/TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect system components for loose connectors and cables.
5. Troubleshoot the Maintain Power Management and Distribution Subsystem (PMDS).
6. Diagnose the Maintain Power Management and Distribution Subsystem (PMDS).
7. Replace defective component(s).
8. Verify fault has been corrected.
9. Complete TAMMS forms, as required.
10. Maintain tools, equipment, and TMDE.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Selected/used applicable publications.	—	—
2. Selected/used proper tools/TMDE.	—	—
3. Practiced shop safety and maintenance discipline.	—	—
4. Inspected system components for loose connectors and cables.	—	—
5. Troubleshoot the Maintain Power Management and Distribution Subsystem (PMDS).	—	—
6. Diagnosed the Maintain Power Management and Distribution Subsystem (PMDS).	—	—
7. Replaced defective component(s).	—	—
8. Verified fault has been corrected.	—	—
9. Completed TAMMS forms, as required.	—	—
10. Maintained tools, equipment, and TMDE.	—	—

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If any performance measure is failed, tell the Soldier what was done wrong and how to do it correctly.

Operation of Commander's Tactical Display (CTD)

091-AB9-0018

Conditions: In a contemporary operational environment (COE) given a M2/M3A3 series vehicle or a M2/M3A3 series turret trainer and applicable references.

Standards: Operate the commander's tactical display in accordance with applicable technical publications. When the task is completed, the equipment or end item is fully mission capable, or required maintenance actions to be performed by other than 91M skill levels (SLs) 1/2 personnel will be identified.

Performance Steps

1. Select/use applicable publications.
2. Select/use proper tools/TMDE.
3. Practice shop safety and maintenance discipline.
4. Inspect system components for loose connectors and cables.
5. Troubleshoot Commander's Tactical Display (CTD).
6. Diagnose Commander's Tactical Display (CTD).
7. Replace defective component(s).
8. Verify fault has been corrected.
9. Complete TAMMS forms, as required.
10. Maintain tools, equipment, and TMDE.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Selected/used applicable publications.	—	—
2. Selected/used proper tools/TMDE.	—	—
3. Practiced shop safety and maintenance discipline.	—	—
4. Inspected system components for loose connectors and cables.	—	—
5. Troubleshoot Commander's Tactical Display (CTD).	—	—
6. Diagnosed Commander's Tactical Display (CTD).	—	—
7. Replaced defective component(s).	—	—
8. Verified fault has been corrected.	—	—
9. Completed TAMMS forms, as required.	—	—
10. Maintained tools, equipment, and TMDE.	—	—

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If any performance measure is failed, tell the Soldier what was done wrong and how to do it correctly.

Skill Level 3

Subject Area 5: COMMON LOGISTIC TASKS

Manage a Maintenance Facility Safety Program

091-CLT-3001

Conditions: In a contemporary operational environment (COE) given Army regulation (AR) 190-13, AR 220-1, AR 385-10, AR 700-138, AR 750-1, Department of the Army (DA) Pamphlet 750-8, Field Manual (FM) 4-30.3, Technical Bulletin, TB 43-0142, and TB 43-180, a maintenance site/facility, and maintenance personnel.

Standards: Ensure that personnel followed all safety procedures and preventable accidents were avoided. If accidents occurred, they were properly recorded and reported in accordance with applicable references.

Performance Steps

1. Ensure all safety references were on hand.
1. Ensure all safety references were on hand.
2. Establish and document goals and requirements for a successful shop safety and accident prevention program.
2. Establish and document goals and requirements for a successful shop safety and accident prevention program.
3. Brief and regularly update subordinates on shop safety program.
3. Brief and regularly update subordinates on shop safety program.
4. Conduct initial safety inspections.
4. Conduct initial safety inspections.
5. Ensure initial safety concerns and violations are corrected.
5. Ensure initial safety concerns and violations were corrected.
6. Conduct scheduled and unscheduled safety inspections.
6. Conduct scheduled and unscheduled safety inspections.
7. Document safety violations, report the violations as required, and conduct follow-up inspections to ensure violations were corrected.
7. Document safety violations, report the violations as required, and conduct follow-up inspections to ensure violations were corrected.
8. Keep necessary records of safety inspections and accident reports.
8. Keep necessary records of safety inspections and accident reports.
9. Ensure Material Safety Data Sheets (MSDSs) were prepared and maintained as required in applicable work areas.
9. Ensure material safety data sheets (MSDS) are prepared and maintained as required in applicable work areas.

Evaluation Preparation: None

Performance Measures	<u>GO</u>	<u>NO-GO</u>

Establish a Maintenance Facility Publications/Electronic Technical Manual Library
091-CLT-3002

Conditions: In a contemporary operational environment (COE) given publications, electronic technical manuals (ETMs)/interactive electronic technical manuals (IETMs), computer with access to the World Wide Web, storage location, local and higher headquarters publications indexes and publications procedures, standing operating procedure (SOP), and applicable forms and references.

Standards: Ensure required publications, ETMs/IETMs are on hand or ordered, publications were arranged and maintained properly, forms/records were properly maintained, and changes were posted in accordance with applicable references and local procedures.

Performance Steps

1. Determine all publications required by the maintenance shop or section.
2. Review and update publications library SOP as needed.
3. Ensure that technical publications on hand or on order were the most current in accordance with DA Pamphlet 25-30.
4. Ensure that doctrinal, training, and organizational publications on hand or on order were the most current in accordance with DA Pamphlet 25-30 and local listings.
5. Ensure that administrative publications on hand or on order were the most current in accordance with DA Pamphlet 25-30.
6. Ensure that local and higher headquarters publications on hand or on order were the most current in accordance with DA Pamphlet 25-30 and local listings.
7. Prepare DA Form 4569-1-R (Security Assistance Publication Requisition Code Sheet (LRA)) in accordance with DA Pamphlet 25-33.
8. Prepare the required transmittal form in accordance with DA Pamphlet 25-33.
9. Prepare DA Form 17 (Requisition for Publications and Blank Forms) and DA Form 17-1 (Requisition for Publications and Blank Forms (Continuation Sheet) to request local and higher headquarters publications in accordance with DA Pamphlet 25-33 and local or higher headquarters publications requisitioning procedures.
10. Ensure that published changes were posted to applicable publications in accordance with DA Pamphlet 25-40 and publications change instructions.
11. Remove obsolete, rescinded, or superseded publications from library in accordance with DA Pamphlet 25-40 and publications change instructions.
12. Arrange publications in proper order and in a suitable location in accordance with DA Pamphlet 25-40.
13. Label binders used for storing library publications in accordance with AR 25-400-2 and DA Pamphlet 25-40.
14. Notify personnel to return loaned publications to the library in a timely manner in accordance with publications library SOP.
15. Update Army Publishing Directorate (APD), local, and higher headquarters publications accounts, as required, in accordance with DA Pamphlet 25-33 and local or higher headquarters publications account instructions.

Performance Measures	<u>GO</u>	<u>NO-GO</u>
1. Determined all publications required by the maintenance shop or section.	—	—
2. Reviewed and updated publications library SOP as needed.	—	—
3. Ensured that technical publications on hand or on order were the most current in accordance with DA Pamphlet 25-30.	—	—
4. Ensured that doctrinal, training, and organizational publications on hand or on order were the most current in accordance with DA Pamphlet 25-30 and local listings.	—	—

Manage Tool Control Procedures

091-CLT-3005

Conditions: In a contemporary operational environment (COE) given Army regulation (AR) 190-13, AR 220-1, AR 385-10, AR 700-138, AR 750-1, Department of the Army (DA) Form 2062 (Hand Receipt/Annex Number), DA Pamphlet 710-2-1, DA Pamphlet 750-8, Field Manual (FM) 1-02, FM 4-30.3, applicable supply catalog(s), applicable references, and hand receipt forms.

Standards: Manage tool control procedures in accordance with applicable references.

Performance Steps

1. Ensure applicable references were available.
2. Establish policies and procedures for the control of tools.
3. Ensure all Department of the Army (DA) Form 2062s (Hand Receipt/Annex Number) were properly filled out and updated.
4. Ensure tools and equipment were inventoried in accordance with applicable references.
5. Ensure tool shortages were annotated on a shortage annex.
6. Ensure subordinates applied property accountability procedures.

Evaluation Preparation: None

Performance Measures	<u>GO</u>	<u>NO-GO</u>

Supervise Maintenance Operations

091-CLT-3009

Conditions: In a contemporary operational environment (COE) given maintenance personnel, equipment, maintenance facility/site, Army regulation (AR) AR 385-10, AR 600-55, AR 700-4, AR 700-138, AR 710-2, AR 725-50, AR 735-5, AR 750-1, AR 750-43, Department of the Army (DA) Pamphlet 25-30, DA Pamphlet 710-2-1, DA Pamphlet 710-2-2, DA Pamphlet 750-1, DA Pamphlet 750-3, DA Pamphlet 750-8, Field Manual (FM) 4-30.3, standing operating procedures (SOPs), and applicable references.

Standards: Establish and maintain an effective maintenance shop operation in accordance with SOP and applicable references.

Performance Steps

1. Ensure unit maintenance procedures are in accordance with AR 750-1, DA Pamphlet 750-3, and local and major Army command (MACOM) policies.
 - a. Review unit SOPs for maintenance.
 - b. Inform unit personnel of changes in policy and new policy that impacts unit SOP.
2. Provide technical assistance to unit maintenance activities.
 - a. Inspect unit maintenance operations.
 - b. Identify shortcomings.
 - c. Make recommendations for corrective actions.
 - d. Provide training in maintenance procedures.
 - e. Provide training and technical assistance as needed for operations under extreme heat (up to 125 degrees Fahrenheit [F]).
 - (1) Cooling systems. Check coolant level daily. Maintain coolant levels approximately two inches below the radiator overflow pipe if so equipped. Check radiator air passages for obstructions frequently. Check fan belt for proper tension. Check coolant temperature indicators frequently for any indication of overheating.
 - (2) Lubrication. Make sure that lubricants used are as specified for the prevailing ambient temperature in the current lubrication order.
 - (3) Fuel system. When filling the fuel tanks, allow sufficient space for fuel expansion.
 - (4) Batteries. Check electrolyte level frequently. Add distilled water as required to compensate for evaporation.
 - (5) Engine. Kept the external surface of the engine as clean as possible.
 - f. Provide training and technical assistance as needed for operations in dusty or sandy areas.
 - (1) General. If possible, provide shelter for the equipment. Use available natural barriers to shield the equipment from blowing dust or sand.
 - (2) Cleaning. Wipe dust and sand from the equipment frequently. When possible, thoroughly washed down with clean water.
 - (3) Engine. Shorten the service interval for the engine air cleaner and oil filter to compensate for intake of additional dust or dirt. Kept external surface of engine as clean as possible.
 - (4) Fuel systems. Drain sediment from fuel tanks, fuel strainers, and fuel filters frequently. Was particularly careful to prevent dust or dirt from entering the fuel tank/fuel system. Shorten the service intervals for the fuel filters appropriately.
 - (5) Lubrication. Lubrication intervals must be shortened appropriately. Use particular care to keep lubricants from becoming contaminated with dust or dirt.
3. Provide maintenance management to units.
 - a. Review reports (Materiel Condition Status Report [MCSR] and (Unit Level Logistics System-Ground [ULLS-G]).
 - b. Coordinate with higher-level maintenance activities.
 - c. Direct cross-leveling of maintenance assets/workloads.
 - d. Prioritize maintenance efforts of units.

Evaluation Preparation: None

Performance Measures	<u>GO</u>	<u>NO-GO</u>
1. Ensured unit maintenance procedures are in accordance with AR 750-1, DA Pamphlet 750-3, and local and MACOM policies.	—	—
1. Ensured unit maintenance procedures are in accordance with AR 750-1, DA Pamphlet 750-3, and local and major Army command (MACOM) policies.	—	—
a. Reviewed unit SOPs for maintenance.		
b. Informed unit personnel of changes in policy and new policy that impacts unit SOP.		
2. Provided technical assistance to unit maintenance activities.	—	—
2. Provided technical assistance to unit maintenance activities.	—	—
a. Inspected unit maintenance operations.		
b. Identified shortcomings.		
c. Made recommendations for corrective actions.		
d. Provided training in maintenance procedures.		
e. Provided training and technical assistance as needed for operations under extreme heat (up to 125 degrees Fahrenheit [F]).		
(1) Cooled systems. Check coolant level daily. Maintain coolant levels approximately two inches below the radiator overflow pipe if so equipped. Check radiator air passages for obstructions frequently. Check fan belt for proper tension. Check coolant temperature indicators frequently for any indication of overheating.		
(2) Lubricated. Made sure that lubricants used are as specified for the prevailing ambient temperature in the current lubrication order.		
(3) Fueled system. When filling the fuel tanks, allow sufficient space for fuel expansion.		
(4) Batteries. Checked electrolyte level frequently. Add distilled water as required to compensate for evaporation.		
(5) Engine. Kept the external surface of the engine as clean as possible.		
f. Provided training and technical assistance as needed for operations in dusty or sandy areas.		
(1) General. If possible, provide shelter for the equipment. Use available natural barriers to shield the equipment from blowing dust or sand.		
(2) Cleaned. Wiped dust and sand from the equipment frequently. When possible, thoroughly washed down with clean water.		
(3) Engine. Shorten the service interval for the engine air cleaner and oil filter to compensate for intake of additional dust or dirt. Kept external surface of engine as clean as possible.		
(4) Fueled systems. Drain sediment from fuel tanks, fuel strainers, and fuel filters frequently. Was particularly careful to prevent dust or dirt from entering the fuel tank/fuel system. Shorten the service intervals for the fuel filters appropriately.		
(5) Lubrication. Lubricated intervals must be shortened appropriately. Use particular care to keep lubricants from becoming contaminated with dust or dirt.		
3. Provided maintenance management to units.	—	—
3. Provided maintenance management to units.	—	—
a. Reviewed reports (Materiel Condition Status Report [MCSR]).		
b. Coordinated with higher-level maintenance activities.		
c. Directed cross-leveling of maintenance assets/workloads.		
d. Prioritized maintenance efforts of units.		

Performance Measures

GO

NO-GO

- d. Prioritize maintenance efforts of units.

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

Manage Maintenance Information Systems Reports

091-CLT-3012

Conditions: While stationed in Iraq, your Brigade is given the new Standard Army Maintenance System-1E (SAMS-1E) systems. As the shop foreman for your company, you must Identify the Objectives, Functions, and Management Tools of the SAMS-1E. In a contemporary operational environment (COE) given a computer system or systems with Standard Army Maintenance System-Level 1 Enhanced (SAMS-1E) software, database of equipment files, SAMS-1E operator, Automated Information Systems Manual (AISM)-25-L21-AHN-ZZZ-EM, AISM-25-L26-AHO-ZZZ-EM, Department of the Army (DA) Form 2407 (Maintenance Request), DA Pamphlet 750-8, and applicable references.

Standards: Supervise SAMS-1E functions of a field level maintenance shop in accordance with applicable references.

Performance Steps

1. Ensure necessary equipment and publications were available.
2. Ensure SAMS-1E operator was adequately trained.
3. Review the SAMS-1E system and the flow of information to and from system interfaces.
4. Review the purpose and use of SAMS-1E categories and codes.
5. Supervise the processing of maintenance requests (DA Form 2407).
6. Interpret SAMS-1E report to identify maintenance trends and problems.
7. Request and interpret ad hoc reports, as necessary.

Evaluation Preparation: None

Performance Measures	<u>GO</u>	<u>NO-GO</u>
1. Ensured necessary equipment and publications were available.	—	—
2. Accessed the SAMS-1E system.	—	—
3. Reviewed the SAMS-1E system and the flow of information to and from system interfaces.	—	—
4. Reviewed the purpose and use of SAMS-1E categories and codes.	—	—
5. Supervised the processing of maintenance requests (DA Form 2407).	—	—
6. Interpreted SAMS-1E report to identify maintenance trends and problems.	—	—
7. Requested and interpreted ad hoc reports, as necessary.	—	—

Evaluation Guidance: Score the Soldier GO if all performance measures are passed. Score the Soldier NO-GO if any performance measure is failed. If the Soldier fails any performance measure, show what was done wrong and how to do it correctly.

Subject Area 6: TECHNICAL TASKS (SKILL LEVEL 3)

**Perform Diagnostic Procedures of the Traversing System on the M2/M3 BFV
091-91M-3004**

Conditions: In a contemporary operational environment (COE) with minimum supervision given a maintenance request or equipment inspection worksheet describing equipment malfunctions, required tools, and test equipment.

Standards: Perform diagnostic procedures of the traversing system and replace or repair its components on the M2/M3 BFV in accordance with the applicable technical publication procedures and specifications. (See Maintenance Allocation Chart for exact procedures authorized for each MOS and skill level [SL]). When this task is completed, the vehicle or equipment must be fully mission-capable, or maintenance actions required by other than 91M personnel must be identified.

Performance Steps

1. Review work request.
2. Select and use applicable technical publications.
3. Select and use applicable tools and TMDE.
4. Perform initial inspect of the traversing system/components.
5. Diagnose the M2/M3 traversing system/components using TMDE and determine maintenance action to be performed.
6. Repair/replace defective parts/components.
7. Perform a final operational test to verify that the traversing system malfunctions is corrected to specification.
8. Ensure all safety precautions are followed.
9. Ensure the task is performed to acceptable standards.
10. Ensure maintenance forms are completed, as required.
11. Ensure tools and equipment are properly maintained.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Reviewed work request.	—	—

Perform Battlefield Damage Assessment and Repair of the M2/M3 BFV
091-91M-3016

Conditions: In a contemporary operational environment (COE) given the applicable vehicle; repair parts; applicable mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; and applicable technical publications.

Standards: Perform battlefield damage assessment and repair (BDAR) of the M2/M3 BFV. Document required maintenance actions. Supervise and assist personnel assigned to perform BDAR to ensure repair is performed to acceptable standards, with equipment being capable of functioning in a battlefield environment.

Performance Steps

1. Review work request.
2. Ensure applicable technical publications are available.
3. Inspect vehicle to diagnose damage.
4. Determine necessary BDAR repairs.
5. Ensure proper tools, TMDE, and equipment are available to perform BDAR.
6. Perform BDAR of the M2/M3 BFV in accordance with applicable references.
7. Ensure task is performed in accordance with appropriate technical manuals and references.
8. Perform a final inspection to ensure the vehicle is capable of functioning in a battlefield environment.
9. Ensure maintenance forms are completed, as required.
10. Ensure tools and equipment are properly maintained.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Reviewed work request.	—	—
2. Ensured applicable technical publications are available.	—	—
3. Inspected vehicle to diagnose damage.	—	—

Perform Diagnostic Procedures of the 25MM Gun System on the M2/M3 BFV
091-91M-3046

Conditions: In a contemporary operational environment (COE) given an M2/M3 series vehicle; repair parts; artillery and turret mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Perform diagnostic procedures of the 25mm gun system and replace or repair its components on the M2/M3 BFV in accordance with the applicable technical publication procedures and specifications. (See Maintenance Allocation Chart for exact procedures authorized for each military occupational specialty (MOS) and skill level [SL]). When this task is completed, the vehicle or equipment must be fully mission-capable, or maintenance actions required by other than 91M personnel must be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Follow shop safety and maintenance discipline.
4. Perform initial inspection on the 25mm gun system.
5. Remove the M242, 25mm automatic gun.
6. Diagnose the M242, 25mm automatic gun.
7. Repair/replace defective parts/components.
8. Perform adjustment on the 25mm gun system.
9. Perform a final operational test to verify that the 25m gun system malfunction(s) is corrected to specification.
10. Annotate corrective actions taken on the DA Form 5988-E, as required.
11. Maintain tools and equipment.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Selected and used applicable technical publications.	—	—
2. Selected and used applicable tools and TMDE.	—	—

Perform Diagnostic Procedures of the GNRs/CMDRs Hand Station on the M2/M3 BFV
091-91M-3050

Conditions: In a contemporary operational environment (COE) given an applicable vehicle; repair parts; general mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Perform diagnostic procedures of the gunners/commanders (GNRs/CMDRs) Hand Station and replace or repair its components on the M2/M3 BFV in accordance with the applicable technical publication procedures and specifications. (See Maintenance Allocation Chart for exact procedures authorized for each military occupational specialty [MOS] and skill level [SL]). When this task is completed, the vehicle or equipment must be fully mission-capable, or maintenance actions required by other than 91M personnel must be identified.

Performance Steps

1. Select and use applicable publications.
2. Select and use correct tools/TMDE.
3. Practice maintenance discipline.
4. Follow prescribed safety procedures.
5. Verified work request.
6. Perform initial inspection.
7. Diagnose the GNRs/CMDRs Hand Station using TMDE.
8. Replace/repair components, as required.
9. Perform a final operational check to verify part is replaced to specifications.
10. Verify fault had been corrected.
11. Maintain tools and equipment.
12. Complete DA Form 5988-E (Equipment Inspection and Maintenance Worksheet), as required.

Performance Measures

Perform Diagnostic Procedures of the Turret Electrical System on the M2/M3 BFV
091-91M-3051

Conditions: In a contemporary operational environment (COE) given an applicable vehicle; repair parts; general mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Perform diagnostic procedures of the turret electrical system and replace or repair its components on the M2/M3 BFV in accordance with the applicable technical publication procedures and specifications. (See Maintenance Allocation Chart for exact procedures authorized for each military occupational specialty [MOS] and skill level [SL]). When this task is completed, the vehicle or equipment must be fully mission-capable, or maintenance actions required by other than 91M personnel must be identified.

Performance Steps

1. Review the work request.
2. Perform an initial inspection.
3. Determine the required maintenance action.
4. Ensure proper tools are available to perform this task.
5. Ensure parts are identified and requisitioned as required.
6. Ensure applicable publications are available.
7. Ensure all safety precautions are followed.
8. Diagnose the turret electrical system using TMDE.
9. Ensure the task is performed to TM standards.
10. Perform a final inspection.
11. Ensure maintenance forms are completed, as required.
12. Ensure tools and equipment are properly maintained.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Reviewed the work request.	—	—

Remove Turret Assembly on the M2/M3 BFV

091-91M-3057

Conditions: In a contemporary operational environment (COE) given an applicable vehicle; repair parts; general mechanic's tool kit; additional tools, test, measurement, and diagnostic equipment (TMDE), and equipment as indicated in technical manuals (TMs); a maintenance request or equipment inspection worksheet describing equipment malfunctions; applicable technical publications; and supervision/assistance.

Standards: Remove turret assembly and replace or repair its components on the M2/M3 BFV in accordance with the applicable technical publication procedures and specifications. (See Maintenance Allocation Chart for exact procedures authorized for each military occupational specialty [MOS] and skill level [SL]). When this task is completed, the vehicle or equipment must be fully mission-capable, or maintenance actions required by other than 91M personnel must be identified.

Performance Steps

1. Select and use applicable technical publications.
2. Select and use applicable tools and TMDE.
3. Practice shop safety and maintenance discipline.
4. Perform initial inspection.
5. Remove turret assembly.
6. Perform a final operational test to verify turret assembly replaced to specification.
7. Complete TAMMS forms as required.
8. Maintain tools and equipment.

Performance Measures

Skill Level 4

Subject Area 7: COMMON LOGISTICS MANAGEMENT TASKS

Perform Senior Rater Responsibilities for a Maintenance Section**091-CLT-4001**

Conditions: In a contemporary operational environment (COE) given a noncommissioned officer evaluation report (NCOER) with the rater's portion completed, accompanying counseling statements, and Army regulation (AR) 623-3.

Standards: Perform senior rater's responsibilities in accordance with applicable references.

Performance Steps

1. Ensure all materials and references were available.
2. Review quarterly counseling that supported the NCOER.
3. Review the administrative data and rater's portions of the NCOER for accuracy and content.
4. Prepare the senior rater's portion of the NCOER.
5. Submit the NCOER for review and further processing.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>

Supervise Platoon/Section Administrative Procedures
091-CLT-4002

Conditions: In a contemporary operational environment (COE) given Army regulation (AR) 25-400-2, AR 600-8-2, AR 614-200, AR 635-200, situation(s) requiring platoon/section administrative procedures supervision and applicable forms, records, and publications.

Standards: Supervise platoon or section administrative procedures in accordance with applicable references.

Performance Steps

1. Establish files using the Army Records Information Management System (ARIMS).
 - a. Prepare file folders and guides
 - b. Arrange file folders and guides.
 - c. Prepare file drawer labels.
 - d. Prepare a list of file numbers
2. Process a recommendation for award.
3. Process and update a flag on records.
4. Verify the accuracy of Suspension of Favorable Action Report.
5. Process and update a bar to reenlistment.
6. Process a chapter action.
 - a. Select appropriate type of chapter action and identify separation guidelines.
 - b. Initiate and follow up on the chapter action.
7. Process a recommendation for advancement/promotion.
8. Verify accuracy of Enlisted Promotion Report (AAC-C01).
9. Assist a subordinate noncommissioned officer (NCO) who had received notice of selection to be released under the Qualitative Management Program (QMP).

Performance Measures

Plan Logistics Support for Maintenance Operations
091-CLT-4011

Conditions: In a contemporary operational environment (COE) given Field Manual (FM) 4-30.3, an operation order (OPORD)/maintenance situation, maintenance personnel and equipment, and applicable references.

Standards: Plan logistics support for maintenance operations in accordance with applicable references.

Performance Steps

1. Assess the combat situation.
2. Determine support needed.
 - a. People (skills and numbers).
 - b. Equipment (transportation, tools, test, measurement, and diagnostic equipment [TMDE], and communications).
 - c. Supplies (components, assemblies, and repair parts).
3. Organize resources to provide needed support.
4. Follow these planning considerations:
 - a. Number and type of units supported.
 - b. Stock levels for repair parts.
 - c. Forward displacement of maintenance support teams and maintenance collection points.
 - d. Channels and procedures for recovery, collection, evacuation, and disposition of captured or abandoned materiel.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>

Conduct a Route Reconnaissance for a Maintenance Mission**091-CLT-4023**

Conditions: In a contemporary operational environment (COE) given Field Manual (FM) 3-34.170, FM 4-30.3, a maintenance situation/operation order (OPORD), operational overlay, grid coordinates for a proposed route, map, vehicle with personnel, and applicable references.

Standards: Conduct a route reconnaissance for a given route identifying distances/times, problem areas along the route, possible bypasses or alternate routes, and prepared strip maps in accordance with the maintenance situation/OPORD and applicable references.

Performance Steps

1. Ensure necessary equipment and publications were available.
2. Determine the route to be used for the maintenance mission.
3. Perform a map reconnaissance of the route.
4. Contact units along the route and coordinated passage.
5. Select personnel to conduct the reconnaissance.
6. Conduct a reconnaissance of the route by identifying the following key features.
 - a. Potential problem areas (that is, possible enemy contact, trafficability, and so forth).
 - b. Possible bypasses and alternate routes.
7. Record information on a strip map for use by the maintenance team.
8. Advise the commander or staff officer on use of the route for maintenance missions.

Performance Measures

Manage Battlefield Maintenance Support

091-CLT-4025

Conditions: In a contemporary operational environment (COE) given Field Manual (FM) 4-30.3, an operation order (OPORD)/maintenance situation, maintenance personnel, equipment, and applicable references.

Standards: Manage battlefield maintenance support in accordance with cited reference.

Performance Steps

1. Assess the combat situation and organized and prioritized support based on the type of operation.
 - a. Offensive operation.
 - b. Defensive operation.
2. Plan for and execute appropriate maintenance support.
 - a. Identify requirements.
 - b. Identify available resources.
 - (1) Personnel and skills.
 - (2) Publications.
 - (3) Time.
 - (4) Facilities.
 - (5) Test, measurement, and diagnostic equipment (TMDE) and tools.
 - (6) Parts.
 - c. Manage resources for maximum return, with priority on the following:
 - (1) Maintenance support forward.
 - (2) Commander's guidance.
 - (3) Battle damage repair.
 - (4) Controlled exchange.
 - (5) Cannibalization.
 - (6) Evacuation.
 - (7) Recovery.
3. Follow priorities for repair of battle damaged systems.
 - a. Most essential for completion of the immediate mission.
 - b. Least amount of time to repair.
 - c. Repairable, but not in time to continue the immediate mission.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Assessed the combat situation and organized and prioritized support based on the type of operation.	—	—

Manage Maintenance Operations at a Maintenance Collection Point
091-CLT-4027

Conditions: In a contemporary operational environment (COE) given Field Manual (FM) 4-30.3, an operation order (OPORD)/maintenance situation, a maintenance collection point (MCP) site, maintenance personnel and equipment, and applicable references.

Standards: Manage maintenance operations at an MCP in accordance with the OPORD and cited references.

Performance Steps

1. Set up the MCP.
2. Manage flow of equipment for repair.
 - a. Focus efforts toward repairing systems for current battle or start of next battle.
 - b. Fix 4 to 6 hour jobs at unit maintenance collection point (UMCP).
 - c. Evacuate other equipment to brigade MCP or farther rear location.
 - d. Maximize battlefield damage assessment repair (BDAR), cannibalization, and controlled exchange at central MCP.
3. Manage company maintenance teams, recovery support teams, and maintenance support teams held at MCP.
4. Manage Prescribed Load List (PLL) assets for forward combat units.
5. Relocate forward (as necessary) to continue fix-forward support.

Provide Maintenance Support During Tactical Operations
091-CLT-4028

Conditions: In a contemporary operational environment (COE) given Field Manual (FM) 4-30.3, an operation order (OPORD)/maintenance situation, maintenance personnel and equipment, and applicable references.

Standards: Provide maintenance support during tactical operations in accordance with the OPORD and cited reference.

Performance Steps

1. Provide maintenance support during offensive
2. Provide maintenance support during defensive
3. Provide maintenance support during retrograde operations.
4. Provide maintenance support during reconstitution operations.
5. Provide maintenance support during night operations.
6. Provide maintenance support in a chemical, biological, radiological, nuclear (CBRN) environment.
7. Provide maintenance support during stability and support operations (SASO).
 - a. Peace operations.
 - b. Humanitarian operations.
 - c. Disaster relief operations.
8. Provide maintenance support in adverse conditions.
 - a. Desert operations.
 - b. Cold weather operations.
 - c. Jungle operations.
 - d. Mountain operations.
 - e. Urban terrain operations.

Performance Measures

	<u>GO</u>	<u>NO-GO</u>
1. Provided maintenance support during offensive operations.	—	—
2. Provided maintenance support during defensive operations.	—	—
3. Provided maintenance support during retrograde operations.	—	—
4. Provided maintenance support during reconstitution operations.	—	—
5. Provided maintenance support during night operations.	—	—
6. Provided maintenance support in a chemical, biological, radiological, nuclear (CBRN) environment.	—	—
7. Provided maintenance support during stability and support operations (SASO). <ol style="list-style-type: none"> a. Peace operations. b. Humanitarian operations. c. Disaster relief operations. 	—	—

APPENDIX A -**HANDS-ON EVALUATION (DA FORM 5164-R)
INSTRUCTIONS
(Excerpted from STP 21-24-SMCT, Appendix C)**

DA Form 5164-R (Hands-On Evaluation) allows the trainer to keep a record of the performance measures a soldier passes or fails on each task.

Before evaluation:

1. Obtain a blank copy of DA Form 5164-R, which you may locally reproduce on 8 ½" x 11" paper.
2. Enter the task title and 10-digit number from the STP task summary.
3. In Column a, enter the performance measure numbers from the task summary.
4. In Column b, enter the performance measure corresponding to the number in Column a (you may abbreviate this information if necessary).
5. Locally reproduce the partially completed form when evaluating more than one soldier on the task or when evaluating the same soldier more than once.

During evaluation:

1. Enter the date just before evaluating the soldier's task performance.
2. Enter the evaluator's name, the soldier's name, and the unit.
3. For each performance measure in Column b, enter a check in Column c (PASS) or Column d (FAIL), as appropriate.
4. Compare the number of performance measures the soldier passes (and, if applicable, which ones) against the task standards specified in the task summary. If the standards are met or exceeded, check the GO block under STATUS; otherwise, check the NO-GO block.

APPENDIX B -**FIELD EXPEDIENT SQUAD BOOK (DA FORM 5165-R)
INSTRUCTIONS
(Excerpted from STP 21-24-SMCT, Appendix C)**

DA Form 5165-R (Field Expedient Squad Book) allows the trainer to keep a record of task proficiency for a group of soldiers.

Before evaluation:

1. Obtain a blank copy of DA Form 5165-R, which you may locally reproduce on 8 ½" x 11" paper.
2. Locally reproduce the partially completed form if you are evaluating more than nine soldiers.

During evaluation:

1. Enter the names of the soldiers you are evaluating, one name per column, at the top of the form.
2. Under STATUS, record (in pencil) the date in the GO block if the soldier demonstrated task proficiency to soldier's manual standards. Keep this information current by always recording the most recent date on which the soldier demonstrated task proficiency. Record the date in the NO-GO block if the soldier failed to demonstrate task proficiency to soldier's manual standards. Soldiers who failed to perform the task should be retrained and reevaluated until they can meet the standards. When the standards are met, enter the date in the appropriate GO block and erase the previous entry from the NO-GO block.

After evaluation:

1. Read down each column (GO/NO-GO) to determine the training status of an individual. This will give you a quick indication of which tasks a soldier needs training on.
2. Read across the rows for each task to determine the training status of all soldiers. You can readily see which tasks to focus training on.
3. Line through the STATUS column of any soldier who leaves the unit.

TM 9-2350-292-14&P	Interactive Electronic Technical Manual (IETM) for Recovery Vehicle, Heavy, M88A2 (HERCULES) (THIS ITEM IS INCLUDED ON EM 0266) 15 June 2007
TM 9-2350-294-10-1	Operator's Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) 15 September 2000
TM 9-2350-294-10-2-1	Operator's Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) Turret 15 September 2000
TM 9-2350-294-10-2-2	Operator's Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) Turret 15 September 2000
TM 9-2350-294-20-1-1	Unit Maintenance Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) Hull 30 March 2007
TM 9-2350-294-20-1-2	Unit Maintenance Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) Hull 30 March 2007
TM 9-2350-294-20-1-3	Unit Maintenance Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) Hull 30 March 2007
TM 9-2350-294-20-1-4	Unit Maintenance Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) Hull 30 March 2007
TM 9-2350-294-20-1-5	Unit Maintenance Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) Hull 30 March 2007
TM 9-2350-294-20-2-1	Unit Maintenance Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) Turret 15 September 2000
TM 9-2350-294-20-2-2	Unit Maintenance Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) Turret 15 September 2000
TM 9-2350-294-20-2-3	Unit Maintenance Manual for Fighting Vehicle, Infantry, M2A3, NSN 2350-01-436-0005 (EIC APG) and Fighting Vehicle, Cavalry, M3A3, NSN 2350-01-436-0007 (EIC APH) Turret 15 September 2000
TM 9-2350-314-10	Operator's Manual for Howitzer, Medium, Self-Propelled: 155MM, M109A6 (NSN 2350-01-305-0028)(EIC:3FC) 8 February 1999
TM 9-243	Use and Care of Hand Tools and Measuring Tools TO 32-1-101; M6290-AJ-MAN-010; TM-10209-10/1 1 December 2004

TM 9-2520-270-34	Direct and General Support Maintenance Manual for Hydromechanical Crossdrive Transmission, HMPT 500 and Transmission Container Assembly (NSN 2520-01-105-6446)(Reprinted W/Basic Incl C1-4)(This Item is Included on EM 0043 & EM 0062) 6 November 1984
TM 9-4910-751-14&P	Operator, Unit, Direct Support Maintenance Manual for Test Set, STE-M1/FVS (NSN 6625-01-135-4389) (4910-01-135-4379) (4910-01-142-2640) (Reprinted w/Basic Incl C1-2) 28 May 1991
TM 9-6625-2301-14&P	Interactive Electronic Technical Manual (IETM) for Operating Instructions, Organization/Direct Support/General Support Maintenance, and Repair Parts List for Test Set, Electronic Systems, AN/PSM-95 (NSN 6625-01-445-0085), Part No. 13580703, 21 June 2006
TM 9-8000	Principles of Automotive Vehicles 25 October 1985
